Technical Manual for Rifle U. S. Type 99 Japanese Cal . 30-06 Ltc Arisaka Nariakira, 2017-09-10 KNOW YOUR RIFLE During the Korean War approximately 126 500 short and 6 650 long Type 99 Rifles were re chambered under American supervision at the Tokyo arsenal to fire the U S Military M2 30 06 Springfield cartridge These rifles were fitted with a lengthened magazine well and had a small notch cut in the top of the receiver ring in order to accommodate the 30 06 rounds 1 3 of an inch greater overall length The Pentagon rather wisely wrote a Technical Manual for the converted rifles that addresses inspection of the weapon care assembly and function This then is that TM Truth be told an Army Technical Manual is an instructional book In this case it names all of the Arisaka rifle parts and details what they do Its illustrations show those parts in mechanical drawings Naturally there is a section on disassembly and assembly of the Arisaka Type 99 The bayonet is covered briefly as is the different types of 30 06 ammunition that can be fired out of the rifle M 2 Ball Tracer Armor Piercing blank The section on the antiaircraft sights explains how the sights are to be used and which marks on the sight arms correspond to speed and distance In other words the narrative explains how to use the sights to shoot at aircraft Golden BB notwithstanding good luck with that Modestly illustrated and printed in Large Format 8 x 10 You should also know this manual is widely available in PDF format online But it has problems The physical copy the PDF was made from is said to have been a bring home from a U S GI It is faded blurry and hard to read Our print version has the distinct advantage of being crystal clear and you can hold it in your hand and reference it without having to do a file search Finally it has been suggested that this is actually a South Korean manual Our editors considered that possibility when the book was still under consideration for publishing But to our way of thinking it did not make sense that the US Army Ordnance Corps would take on refitting tens of thousands of Type 99 rifles and not participate in the writing of its manual Moreover you will notice the book is written in English not Korean Few South Korean soldiers spoke much less read English *Basic Field Manual* United States.
