The Planning Imagination Mark Tewdwr-Jones,Nicholas Phelps,Robert Freestone,2013-10-01 Knighted in 1998 for services to the Town and Country Planning Association and in 2003 named by Her Majesty Queen Elizabeth II as a Pioneer in the Life of the Nation Peter Hall is internationally renowned for the breadth and depth of his studies and writings on urban and regional planning For the last 50 years he has captured and helped to create the planning imagination Here the editors have brought together in five themes a series of critical reflections on Peter s vast and diverse contributions Those reflections are provided by colleagues familiar with his work The five parts are devoted to Peter Hall s breadth of academic work covering the history of cities and planning London spatial planning connectivity and mobility and urban globalization Finally as a sixth part the editors have asked Peter Hall himself to reflect on his career and the sources of his imagination The story this book tells is not one of a singular totally consistent theoretical and philosophical view elaborated over several decades Rather it covers a set of views that necessarily admits signs of Peter s inconsistency and imperfection over the years the insights and imperfections that inevitably accompany the exercise of a nonetheless remarkably fertile restless and inspiring planning imagination

Peripheral Centralities Nicholas A. Phelps, Roger Keil, Paul Maginn, 2025-04-01 The term peripheral centralities may seem

something of an oxymoron and yet the spatial peripheries of cities have often been more central to urban development processes than is appreciated To better understand the nature of peripheral centrality *Peripheral Centralities The Lost and Past Urbanity of the Suburbs* brings together a wide variety of examples of lost and forgotten peripheral centralities of different sizes purpose geographical location and political complexion dating from the first decades of the twentieth century to the present day Following the introduction two chapters provide broad overviews of peripheral centralities in international and national systems of centralities The next four chapters look at plans from settings as different as Dublin and Shanghai that for one reason or another failed to materialize The following eight chapters each describes cases where projects have been realized ranging from peripheral townships in England to a Chinese steel city To conclude the book the editors highlight the themes revealed in the foregoing chapters and consider the part an appreciation of peripheral centralities might play in the development of urban theory from the outside in

How to Build Houses and Save the

Countryside Shaun Spiers, 2018-03-14 England has a housing crisis We need to build many more new homes to house our growing population but house building is controversial particularly when it involves the loss of countryside Addressing both sides of this critical debate Shaun Spiers argues that to drive house building on the scale needed government must strike a contract with civil society in return for public support and acceptance of the loss of some countryside it must guarantee high quality affordable developments in the right locations Simply imposing development as recent governments of all political persuasions have attempted will not work Focusing on house building and conservation politics in England Spiers uses his considerable experience and extensive research to demonstrate why the current model doesn't work and why there needs to be both planning reform and a more active role for the state including local government Sir Peter Hall: Pioneer in Regional Planning, Transport and Urban Geography Richard D. Loo, Claude Comtois, 2016-03-03 Revitalizing railways as a major sustainable transport mode in modern societies faces many issues and challenges This in depth overview places the importance of railways in the wider context of comprehensive sustainability which encompasses sustainable development social and economic equity and community livability Some scholars have described the 21st century as a period of renaissance for railways and suggest this transport mode can fulfil people's desire for high mobility with low negative environmental social economic and financial impacts In light of these new expectations for railways in both passenger and freight transport worldwide this book offers the latest research insights on the renewed interest about railway expansions and their wide ranging environmental socio economic and even political implications Planning the Great Metropolis David Johnson, 2015-01-09 As the Regional Plan Association embarks on a Fourth Regional Plan there can be no better time for a paperback edition of David Johnson's critically acclaimed assessment of the 1929 Regional Plan of New York and Its Environs As he says in his preface to this edition the questions faced by the regional planners of today are little changed from those their predecessors faced in the 1920s Derided by some accused by others of being the root cause of New York City's relative economic and physical decline the 1929 Plan was in reality an important source of ideas for many projects built during the New Deal era of the 1930s In his detailed

examination of the Plan Johnson traces its origins to Progressive era and Daniel Burnham's 1909 Plan of Chicago. He describes the making of the Plan under the direction of Scotsman Thomas Adams, its reception in the New York Region and its partial realization. The story he tells has important lessons for planners, decision makers and citizens facing an increasingly urban future where the physical plan approach may again have a critical role to play.

Reinventing a Small, Worldly City Ana Gonçalves, 2016-11-10 Focusing on Cardiff, the capital city of Wales in the UK, this book reflects on a contemporary small European city, its development characteristics and present struggles. Following a century in which it was dubbed the world's coaltropolis, the decline in demand for coal meant that Cardiff endured an acute process of de-industrialisation. In seeking to address this and the related high levels of unemployment it has experienced, a process of cultural and social reinvention since the 1980s and more significantly after Wales turned into a devolved nation in the late 1990s, Cardiff's development from a small port into a capital city is examined and special attention is paid to the city's cultural and social transformation in recent decades that has relied on the expansion of specific cultural clusters and tourism, which have been decisive for the transformation of its cultural identity and in shaping the city's individual and collective memories and identities. Cardiff epitomises a quintessential case of urban reinvention, cultural regeneration and social transformation lying between two apparently contradictory paradigms: the need to respond to global demands and the effort to maintain its cultural distinctiveness and Welsh roots. Therefore, it sets the scene for a wider reflection on small cities, especially in the European setting, and what generally characterises these cities: their liveability, cultural creativity and community empowerment, as well as the fact that they facilitate mobility and social interaction. These worldly cities, the book contends, present interesting opportunities and challenges at the urban economic, social and cultural levels that rely on more human scale, people-based approaches to cities, thus defying existing urban hierarchies and categorisations.

Economy and Architecture Juliet Odgers, Mhairi McVicar, Stephen Kite, 2015-07-16 *Economy and Architecture* addresses a timely, critical and much debated topic in both its historical and contemporary dimensions. From the Apple Store in New York City to the street markets of the Pan American Highway, from commercial Dubai to the public schools of Australia, this book takes a critical look at contemporary architecture from across the globe whilst extending its range back in history as far as the Homeric epics of ancient Greece. The book addresses the challenges of practicing architecture within the strictures of contemporary economies grounded on the fundamental definition of economy as the well-managed household derived from the Greek *oikonomia* (oikos: house and *nemein*: manage). The diverse enquiries of the study are structured around the following key questions: How do we define our economies? How are the values of architecture negotiated among the various actors involved? How do we manage the production of a good architecture within any particular system? How does political economy frame and influence architecture? The majority of examples are taken from current or recent architectural practice, historical examples which include John Evelyn's villa Blenheim Palace, John Ruskin's Venice and early twentieth-century Paris, place the

debates within an extended critical perspective

No Little Plans Ian Wray, 2019-05-30 Is planning for America anathema to the pursuit of life liberty and happiness Is it true as ideologues like Friedrich Von Hayek Milton Friedman and Ayn Rand have claimed that planning leads to dictatorship that the state is wholly destructive and that prosperity is owed entirely to the workings of a free market To answer these questions Ian Wray s book goes in search of an America shaped by government plans and bureaucrats not by businesses bankers and shareholders He demonstrates that government plans did not damage

American wealth On the contrary they built it and in the most profound ways In three parts the book is an intellectual roller coaster Part I takes the reader downhill examining the rise and fall of rational planning and looks at the converging bands of planning critics led on the right by the Chicago School of Economics on the left by the rise of conservation and the counterculture and two brilliantly iconoclastic writers Jane Jacobs and Rachel Carson In Part II eight case studies take us from the trans continental railroads through the national parks the Federal dams and hydropower schemes the wartime arsenal of democracy to the postwar interstate highways planning for New York the moon shot and the creation of the internet These are stories of immense government achievement Part III looks at what might lie ahead reflecting on a huge irony the ideology which underpins the economic and political rise of Asia by which America now feels so threatened echoes the pragmatic plans and actions which once secured America s rise to globalism
