Governing Globalization Anthony McGrew, David Held, 2002-12-20 Since the UN's creation in 1945 a vast nexus of global and regional institutions has evolved surrounded by a proliferation of non governmental agencies and advocacy networks seeking to influence the agenda and direction of international public policy Although world government remains a fanciful idea there does exist an evolving global governance complex embracing states international institutions transnational networks and agencies both public and private which functions with variable effect to promote regulate or intervene in the common affairs of humanity This book provides an accessible introduction to the current debate about the changing form and political significance of global governance It brings together original contributions from many of the best known theorists and analysts of global politics to explore the relevance of the concept of global governance to understanding how global activity is currently regulated Furthermore it combines an elucidation of substantive theories with a systematic analysis of the politics and limits of governance in key issue areas from humanitarian intervention to the regulation of global finance Thus the volume provides a comprehensive theoretical and empirical assessment of the shift from national government to multilayered global governance Governing Globalization is the third book in the internationally acclaimed series on global transformations The other two volumes are Global Transformations Politics Economics and Culture and The Global Transformations Reader An Introduction to the Globalization Debate **Handbook of Theories of Aging** Merrill

Reclaiming Constitutionalism Maria Tzanakopoulou, 2018-02-22 Reclaiming Constitutionalism articulates an argument for why the constitutional phenomenon remains attached to the state despite the recent advent of theories of global constitutionalism Drawing from the idea that constitutionalism historically sought to build social consensus this book argues that the primary aim of constitutionalism is to create social peace and to shield rather than to limit the power of political elites in any given state Implicit in the effort to preserve social peace is the fundamentally important acknowledgement of social conflict Constitutionalism seeks to offer a balance between opposing social forces However this balancing process can sometimes ignite rather than appease social conflict Constitutionalism may thus further a project of social struggles and emancipation for it incorporates within its very nucleus the potential for an agonistic version of democracy In light of the connection between social conflict and constitutionalism this book explores the conditions for and locations of the former From the state and the EU to the global level it considers the role of citizenship national identities democracy power and ideology in order to conclude that the state is the only site that satisfies the prerequisites for social conflict Reclaiming constitutionalism means building a discourse that opens up an emancipatory potential a potential that under current conditions cannot be fulfilled beyond the borders of the state

Criticizing Global Governance M. Lederer, P. Muller, 2005-11-18 The essays in this collection seek to reflect on global governance and to provide a better critical understanding of the various practices that fall under its rubric The first part challenges the concept of global governance the second part focuses on organizational and institutional aspects and the last part examines the rule systems implemented by global governance practices The vocabulary of global governance has become a serious contender to imagine world order in the post cold war world Using different strategies of critique the contributors argue that global governance denotes a political vocabulary where acts of definition themselves are political moves

**The Political Power of Global Corporations** John Mikler, 2018-02-12 We have long been told that corporations rule the world their interests seemingly taking precedence over states and their citizens Yet while states civil society and international organizations are well drawn in terms of their institutions ideologies and functions the world's global corporations are often more simply sketched as mechanisms of profit maximization In this book John Mikler re-casts global corporations as political actors with complex

identities and strategies Debunking the idea of global corporations as exclusively profit driven entities he shows how they seek not only to drive or modify the agendas of states but to govern in their own right He also explains why we need to re territorialize global corporations as political actors that reflect and project the political power of the states and regions from which they hail We know the global corporations names we know where they are headquartered and we know where they invest and operate Economic processes are increasingly produced by the control they possess the relationships they have the leverage they employ the strategic decisions they make and the discourses they create to enhance acceptance of their interests This book represents a call to study how they do so rather than making assumptions based on theoretical abstractions

**Globalization** John Glenn,2012-08-06 Rather than claim that there exists a common concept of globalization that all parties can agree to this book seeks to examine some of the conceptions and the way in which they render different interpretations of particular aspects of globalization The last two decades have witnessed an explosive proliferation of academic writings on the subject of globalization which has been accompanied by a high level of interest in the media and widespread usage of the term This has inevitably resulted in the meaning of the concept broadening to include a whole host of issues running the attendant risk of losing any conceptual focus it had John Glenn examines five issue areas affected by globalization the economy sovereignty civil society governance communication In so doing the book aims to articulate certain questions within each area which will allow for some judgment to be made concerning the differing perspectives on globalization Globalization will be of interest to students of international political economy and politics and international relations in general

Konrad Borowicz,2023-08-10 Renowned experts from various academic disciplines theoretically and empirically explore the dynamic evolution and resilience of transnational rule makers through crises

Global Civil Society in International Lawmaking and Global Governance Barbara Woodward,2010-05-17 International law scholarship has not adequately recognised the magnitude of the role of global civil society in global governance and international lawmaking Building upon theoretical historical and legal scholarship and presenting studies of GCS actor practice in a wide range of lawmaking processes including treaty making conferences international organisations and adjudicatory mechanisms this book convincingly demonstrates that GCS actors have created and influenced the creation of norms of binding public international law and influential non binding soft or non law It presents a compelling case that calls for augmenting GCS access to information participation in legal decision making processes for those likely to be affected and access justice thereby enhancing the legitimacy of public international law
