## **Governing Idaho Governing Idaho:**

Governing Idaho James Benjamin Weatherby, Randy Stapilus, 2005 Distributed by the University of Nebraska Press for Caxton Press Idaho is a state with many varied interests vying for political control Whether it be in the politically liberal north the staunchly conservative southeast or the rapidly changing southwest of the state the social and political factors that determine who gains power in the Gem state often flies in the face of logic and makes for an interesting study in contrasts

Idaho's Place Adam M. Sowards, 2014-07-01 Idaho's Place is an anthology of the most current and original writing on Gem State history From the state's indigenous roots and early environmental battles to recent political and social events these essays provide much needed context for understanding Idaho's important role in the development of the American West Through a creative approach that combines explorations of concepts such as politics gender and race with the oral histories of Idaho residents the very people who lived and made state history this unique collection sheds new light on the state's surprisingly contentious past Readers whether they are longtime residents or newcomers tourists or seasonal dwellers policy makers or historians will be treated to a rich narrative in which the many threads of Idaho's history entwine to produce a complete tapestry of this beautiful and complex Western state

**Understanding Authority in Higher Education** Dean O. Smith, 2015-01-22 Within the complex environment of higher education administrators and faculty members face daunting challenges in their unique domains of institutional governance Many of the greatest challenges arise from basic misunderstandings of authority and its limitations by administrators and faculty members alike These misunderstandings are the primary source of disruptive confusion mistrust and mismanagement Consequently an institution's governance would improve significantly if its personnel clearly understand the fundamental principles of authority To bring about this improvement Understanding Authority in Higher Education clarifies issues of authority in an academic setting Throughout it introduces basic concepts of higher education administration and then examines the limits of authority in context Pedagogically the book strives continuously to ascertain whether authority is used properly from a legal perspective emphasizing the influence of academic cultural norms on legal principles and vice versa But Understanding Authority in Higher Education goes further than law textbooks by using real and anecdotal case studies to examine aspects of authority that don't appear in court proceedings those that lie beyond the reach of the law In these cases the book explores the anthropology the behavior and the culture of authority in the academic environment

**Trans-jurisdictional Water Law and Governance** Janice Gray, Cameron Holley, Rosemary Rayfuse, 2016-06-23 Governance of global water resources presents one of the most confounding challenges in contemporary natural resource

governance With considerable government citizen and financial donor attention devoted to a range of international transnational and domestic laws and policies aimed at protecting managing and sustainably using fresh and coastal marine water resources this book proposes that sustainable water outcomes require a trans jurisdictional approach to water governance Focusing on the concept of trans jurisdictional water governance the book diagnoses barriers and identifies pathways to coherent and coordinated institutional arrangements between and across different bodies of laws at local national regional and international levels It includes case studies from the European Union Australia New Zealand South Africa the United States and Southeast Asia Leading specialists offer insights into the pretence and the promise of trans jurisdictional water governance and provide readers including students practitioners policy makers and academics with a basis for better analysing articulating and synthesising standards of good trans jurisdictional water governance both in theory and in practice

for windows of opportunity through adaptive planning and to institutionalize the results of innovative solutions that arise once a window opens Second is the need for legal reform to give government agencies the authority to facilitate and participate in adaptive management and governance This must be accompanied by parallel legal reform to assure that engagement of private and economic actors and the increase in governmental flexibility does not destabilize basin economies or come at the expense of legitimacy accountability equity and justice Third development of means to continually assess thresholds and resilience of social ecological systems and the adaptive capacity of their current governance to structure actions at multiple scales The massive investment in water infrastructure on the river basins studied has improved the agricultural urban and economic sectors largely at the cost of other social and environmental values Today the infrastructure is aging and in need of substantial investment for those benefits to continue and adapt to ongoing environmental changes The renewal of institutions and heavily engineered water systems also presents the opportunity to modernize these systems to address inequity and align with the values and objectives of the 21st century Creative approaches are needed to transform and modernize water governance that increases the capacity of these water based social ecological systems to innovate adapt and learn will provide the tools needed to navigate an uncertain future **Local Government Structure** ,1970
