DESCRIPTION

The XLS80E Intelligent Fire Alarm Control Panel provides a cost-effective platform for a fire alarm system that is both flexible and expandable. The panel offers system designers and end users a technically sophisticated range of facilities and functions whilst maintaining ease of programming, installation, and operation.

The XLS80E control panel is fully compatible with the full range of Honeywell's TC800 Series analogue addressable sensors, control and monitor modules. This makes the XLS80E the perfect solution for retrofit jobs as well as for new projects.

Each panel can support up to 8 analogue addressable loops and each loop can support up to 99 TC800 Series analogue sensors and 99 TC800 Series modules. This gives the XLS80e a panel a maximum capacity of 1584 points.

The XLS80E can also be networked with other XLS80E controllers and repeaters in a "Peer to Peer" architecture. Furthermore, if a graphic based PC front end (GUI) is required, the XLS80e panels can be connected to Honeywell's Enterprise Building Integrator (EBI).

Each panel supervises its own detection system and is designed to function independently of all others in the "Peer to Peer" network in case of a communication failure.

Full function repeater panels complements the XLS80E product range.

System

The XLS80E fire panel will control a combination of up to 99 heat, smoke or multi-criteria sensors on each loop and a combination of 99 call points, monitor, control and conventional zone interface modules and sounders per Honeywell TC800 Series loop.

Depending on the arrangement of user specified zones, isolation modules may also be added to the system although they are not required at loop ends.

The XLS80e controllers, peripheral devices and all the system fields components e.g. sensors and modules are approved to meet with the requirements of EN54
