

2.2.3 Locating the Room Thermostat

While still in the Test Mode, as described in section 2.2.2, the room thermostat should be located taking the following into consideration and reviewing the illustrations below:

1. Find a suitable location where the signal transmission is reliable. Reliable transmission is indicated when the Relay Box is flashing the green LED every 6 seconds. **NOTE:** The Relay Box relay will be off.
2. Install the room thermostat EITHER on the wall using the wall bracket OR attach the optional table stand as shown in below.
3. Exit the Test Mode by moving the setting slider to the required operating mode (**AUTO** or **OFF**).

2.3 System Check

Now a simple test can be completed to check the full system has been installed correctly:

1. Set the slider switch to the **OFF** mode.
2. Check the boiler supply is on and check that the green LED on the Relay Box is off.
3. Set the slider switch to the **MAN** mode.
4. Adjust the setpoint up to the maximum (35°C) by pressing the button. The boiler should come on (green LED **ON** on Relay Box) after a few seconds and the symbol appears on the room thermostat LCD display.
5. Set the slider switch to the **OFF** mode. The boiler will go off (green LED **OFF** on Relay Box) after a few seconds and the symbol disappears.
6. Check the system operation by moving the slider between **MAN** and **OFF** modes several times, bearing in mind the switching delay referred to above.

Now, you should have completed the installation successfully - to begin operating at the default factory settings move the slider to the **AUTO** mode or select **PROG** to modify the built-in heating program accordingly.
