Pathologies of the West Roland Littlewood,2002 Psychiatry conventionally regards spirit possession and dramatic healing rituals in non European societies as forms of abnormality if not mental illness Roland Littlewood a psychiatrist and social anthropologist argues that it is necessary to take into account both social process and personal cultural meaning when explaining psychiatric illness and deviant behavior Littlewood brings anthropological and psychiatric literature to bear on case studies of self poisoning agoraphobia hysteria chronic fatigue syndrome post traumatic stress male sexual violence and eating disorders He contends that Western psychiatric illnesses are themselves possession states patterns by which individual agency is displaced through an idiom of alien intrusion whether of a spirit or a disease *Pathologies of the West* is simultaneously an original approach to psychiatric illness in its international perspective and an introduction to recent developments in the social anthropology of medicine It examines critically the relevance of phenomenological structural and ethological approaches to understanding extreme personal experience Littlewood argues that anthropology must not simply provide a cultural alternative to sociological critiques of medicine psychiatry itself should take into account the ways in which cultural values are acted out by individuals
