Hopkins Michael Hopkins and Partners (London), **Encyclopedia of Twentieth Century Architecture** R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedic of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries **Integrated Buildings** Leonard R. Bachman, 2004-01-27 An anatomical study of building systems integration with guidelines for practical applications Through a systems approach to buildings *Integrated Buildings The Systems Basis of Architecture* details the practice of integration to bridge the gap between the design intentions and technical demands of building projects Analytic methods are introduced that illustrate the value benefit and application of systems integration as well as guidelines for selecting technical systems in the conceptual schematic and design development stages of projects Landmark structures such as Eero Saarinen's John Deere Headquarters Renzo Piano's Kansai International Airport Glenn Murcutt's Magney House and Richard Rogers's Lloyd's of London headquarters are presented as part of an extensive collection of case studies organized into seven categories Laboratories Offices Pavilions Green Architecture High Tech Architecture Airport Terminals Residential Architecture Advanced material is provided on methods of integration including an overview of integration topics the systems basis of architecture and the integration potential of various building systems An expanded case study of Ibsen Nelsen's design for the Pacific Museum of Flight is used to demonstrate case study methods for tracing integration through any work of architecture Visually enhanced with more than 300 illustrations diagrams and photographs *Integrated Buildings The Systems Basis of Architecture* is a valuable reference guide for architecture and civil engineering students as well as architects engineers and other professionals in the construction industry **Architecture an Inspiration** Ivor Smith, 2014-11-28 This book is about appreciation it is an attempt to explain what architecture essentially is rather than merely what it looks like *Architecture an Inspiration* is addressed to those who enjoy buildings cities and landscapes and would like to have a deeper appreciation and a basis for their likes and dislikes A full appreciation demands careful observation and in these pages there are many explorations of this sort The book is divided into two parts the first is about the nature of architecture describing what is necessary The chapter headings define the basic requirements that to varying degrees must always be met such as facilitating activity moderating climate relating to context respecting materials and structure as well as conveying meaning and delight The second part is about the nature of designing and focuses on what the designer brings to the task to arrive at a human and poetic synthesis These different ways of thinking are elusive and not necessarily conscious they include the use

of reason and intuition the value of experience and precedent the role of metaphor and the search for harmony For students this is difficult because there is no right way of designing So much of what is written about the architecture of today is negative that it seemed opportune to take a positive approach and point to work that is good now and in the past and reiterate some timeless qualities Architecture an Inspiration does not set out to be comprehensive Ivor Smith chooses examples that he finds particularly inspiring from the work of a few selected architects The book will appeal to those both interested in and studying architecture Modern Architecture Through Case Studies 1945 to 1990 Peter Blundell Jones, Eamonn Canniffe, 2012-08-21 Once again new interpretations are presented of some of the most famous architecture of the period Work by lesser known architects whose influence and role have been overlooked by conventional histories of the subject is discussed The case study structure allows each example to be discussed and used as a springboard to explore different theoretical approaches Filled with beautiful photographs plans and architect s drawings this is a clear and accessible discussion on a period of architecture that engages many questions still under debate in architecture today

Key Houses of the Twentieth Century Colin Davies, 2006 Featuring over 100 of the most significant and influential houses of the twentieth century For each of the houses included there are numerous accurate scale plans showing each floor together with elevations sections and site plans where appropriate All of these have been specially drawn for this book and are based on the most up to date information and sources **Encyclopedia of 20th Century Architecture** R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century s vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries **The Process of Making** Maki

Kuwayama, Joachim Käppeler, 2018-11-05 The objective of this richly illustrated introduction is to explain and demystify the design processes in architecture urban design and design Starting with the five parameters originally established by Peter von Seidlein s Stuttgart Chair for Building Construction and Design i e grid function detail material and cost the art of design leads to their integration in a balanced whole In the second part of the book the author analyzes in detail the application of these parameters in nine case studies from different periods in different scales and typologies from furniture to private and public buildings through to urban design The book is intended for students as well as for lay people who wish to participate in the public debate on the built environment 20th Century Architecture Martin Pawley, 2000 In his famously controversial style Martin Pawley reviews a selection of books on the architecture of the 20th century Books that we should have read and indeed would have read if only we d had the time Pawley digests and critiques them for us with an agility that

has kept the readers of his newspaper and magazine columns provoked and amused for several decades He provides us with both ammunition and armour encouraging us to fight off the soporific PR led commentary of today and to rekindle the passion of the architectural debate Martin Pawley is an award winning writer He has written many books on architecture for UK and US based publishers and writes a regular column for national and international architectural magazines Throughout his career he has reviewed books for The Guardian The Observer The London Review of Books The Architects Journal Design Book Review Blueprint Architectural Design Building World Architecture Architecture Review Designer and The RIBA Journal many of which are published here Gain knowledge on all the major books on 20th century architecture by reading just one Hear the opinions of Pawley and learn about the debates on the development of architectural theory in the 20th century

The Work of Michael Hopkins - Volume 2 Colin Davies, Michael Hopkins, Patrick Hodgkinson, Charles Jencks, 2001 The second volume on the award winning architect and his firm **Thinking about Architecture** Colin Davies, 2011-10-17 In order to understand architecture in all its cultural complexity it is necessary to grasp such basic concepts as representation form and space The aim of this book is to provide teachers students practising architects and general readers with a set of ideas that will enrich their conversation their writing and above all their thinking about architecture The book is divided into eight chapters each covering a particular aspect of architecture and introduces difficult concepts gradually Architectural theorists and philosophers are mentioned in passing and their works are listed in the bibliography but they are not the subject of the book Architecture rather than philosophy is at the centre of the picture The aim is to enable the reader to understand architecture in all its aspects rather than to learn the names of particular theorists Written in a conversational style Thinking about Architecture is an invaluable and accessible standard introduction to architectural theory **High**

Tech Architecture Angus J Macdonald, 2019-11-08 High Tech sometimes known as Structural Expression is a style of Modern architecture that produced some of the most prominent and visually exciting buildings of the twentieth century The Hongkong and Shanghai Banking Corporation headquarters in Hong Kong the Lloyd s of London headquarters in London UK and the Centre Pompidou in Paris France Extensively illustrated with photographs and diagrams and accessibly written High Tech Architecture A style reconsidered discusses the intended meanings of the visual vocabulary involved in High Tech and places the style in the broad context of other Modern architecture of the twentieth century The book offers a balanced re appraisal of the extravagant claims that have been made for High Tech by its progenitors and architectural critics as an architecture appropriate for the built environment of the future **Guide to London's Contemporary Architecture**
