Azfar Moin, 2012-10-16 At the end of the sixteenth century and the turn of the first Islamic millennium the powerful Mughal emperor Akbar declared himself the most sacred being on earth The holiest of all saints and above the distinctions of religion he styled himself as the messiah reborn Yet the Mughal emperor was not alone in doing so In this field-changing study A. Azfar Moin explores why Muslim sovereigns in this period began to imitate the exalted nature of Sufi saints Uncovering a startling yet widespread phenomenon he shows how the charismatic pull of sainthood *wilayat* rather than the draw of religious law *sharia* or holy war *jihad* inspired a new style of sovereignty in Islam A work of history richly informed by the anthropology of religion and art *The Millennial Sovereign* traces how royal dynastic cults and shrine-centered Sufism came together in the imperial cultures of Timurid Central Asia Safavid Iran and Mughal India By juxtaposing imperial chronicles paintings and architecture with theories of sainthood apocalyptic treatises and manuals on astrology and magic Moin uncovers a pattern of Islamic politics shaped by Sufi and millennial motifs He shows how alchemical symbols and astrological rituals enveloped the body of the monarch casting him as both spiritual guide and material lord Ultimately Moin offers a striking new perspective on the history of Islam and the religious

and political developments linking South Asia and Iran in early modern times Institutional Change in the Public Sphere
Fredrik Engelstad, Håkon Larsen, Jon Rogstad, Kari Steen-Johnsen, 2017-04-24 The main focus of the book is institutional change in the Scandinavian model with special emphasis on Norway There are many reasons to pay closer attention to the Norwegian case when it comes to analyses of changes in the public sphere In the country's political history the arts and the media played a particular role in the processes towards sovereignty at the beginning of the 20th century On a par with the other Scandinavian countries Norway is in the forefront in the world in the distribution and uses of Internet technology As an extreme case the most corporatist society within the family of the Nordic Model it offers an opportunity both for intriguing case studies and for challenging and refining existing theory on processes of institutional change in media policy and cultural policy It supplements two recent important books on political economy in Scandinavia *Varieties of Liberalization* and *The New Politics of Social Solidarity* Kathleen Thelen 2014 and *The Political Construction of Business Interests* Cathie Jo Martin and Duane Swank 2013 There are further reasons to pay particular attention to the Scandinavian and more specifically the Norwegian cases i They are to varying degrees neo corporatist societies characterized by ongoing bargaining over social and political reform processes From a theoretical perspective this invites reflections which to some extent are at odds with the dominant conceptions of institutional change Neither models of path dependency nor models of aggregate incremental change focus on the continuous social bargaining over institutional change ii Despite recent processes of liberalization common to the Western world as a whole corporatism implies a close connection between state public sphere cultural life and religion This also means that institutions are closely bundled in an even stronger way than assumed for example in the *Varieties of Capitalism* literature Furthermore we only have scarce insight in the way the different spheres of corporatism are connected and interact In the proposed edited volume we have collected historical institutional case studies from a broad set of social fields a detailed outline of contents and contributors is attached Critical assessments of Jürgen Habermas theory of the public sphere Can the public sphere be considered an institution The central position of the public sphere in social and political change in Norway Digital transformations and effects of the growing PR industry on the public sphere Institutionalization of social media in local politics and voluntary organizations Legitimation work in the public sphere freedom of expression and warning in the workplace Return of religion to the public sphere and its effects Representing Jewish Thought

From Influence to Inhabitation James E. Christie, 2019-10-02 This book describes how and why the early modern period witnessed the marginalisation of astrology in Western natural philosophy and the re adoption of the cosmological view of the existence of a plurality of worlds in the universe allowing the possibility of extraterrestrial life Founded in the mid 1990s the discipline of astrobiology combines the search for extraterrestrial life with the study of terrestrial biology especially its origins its evolution and its presence in extreme environments This book offers a history of astrobiology s attempts to understand the nature of life in a larger cosmological context Specifically it describes the shift of early modern cosmology from a paradigm of celestial influence to one of celestial inhabitation Although these trends are regarded as consequences of Copernican cosmology and hallmarks of a modern world view they are usually addressed separately in the historical literature Unlike others this book takes a broad approach that examines the relationship of the two From Influence to Inhabitation will benefit both historians of astrology and historians of the extraterrestrial life debate an audience which includes researchers and advanced students studying the history and philosophy of astrobiology It will also appeal to historians of natural philosophy science astronomy and theology in the early modern period
