*Big Java* Cay S. Horstmann, 2013-04-02 Cay Horstmann's fifth edition of *Big Java Early Objects* provides a comprehensive and approachable introduction to fundamental programming techniques and design skills helping students master basic concepts. The inclusion of advanced chapters makes the text suitable for a 2 semester course sequence or as a comprehensive reference to programming in Java. The fifth edition includes new exercises from science and business which engages students with real world applications of Java in different industries. **BACK COVER** *Big Java* Cay S. Horstmann, 2019-08-06 *Big Java Early Objects 7th Edition* focuses on the essentials of effective learning and is suitable for a two semester introduction to programming sequence. This text requires no prior programming experience and only a modest amount of high school algebra. Objects and classes from the standard library are used where appropriate in early sections with coverage on object oriented design starting in Chapter 8. This gradual approach allows students to use objects throughout their study of the core algorithmic topics without teaching bad habits that must be unlearned later. The second half covers algorithms and data structures at a level suitable for beginning students. Choosing the enhanced eText format allows students to develop their coding skills using targeted progressive interactivities designed to integrate with the eText. All sections include built in activities, open ended review exercises, programming exercises and projects to help students practice programming and build confidence. These activities go far beyond simplistic multiple choice questions and animations. They have been designed to guide students along a learning path for mastering the complexities of programming. Students demonstrate comprehension of programming structures then practice programming with simple steps in scaffolded settings and finally write complete automatically graded programs. The perpetual access VitalSource Enhanced eText when integrated with your school's learning management system provides the capability to monitor student progress in VitalSource SCORECenter and track grades for homework or participation. Enhanced eText and interactive functionality available through select vendors and may require LMS integration approval for SCORECenter. **Horstmann, Java Concepts Early Objects, Eighth Edition** JESPERSEN., 2019-03-07 [Big Java, Binder Ready Version](#) Cay S. Horstmann, 2013-01-04 This book introduces programmers to objects at a gradual pace. Optional example modules are included using Alice and Greenfoot. The examples feature annotations with dos and don'ts along with cross references to more detailed explanations in the text. New tables show a large number of typical and cautionary examples. New programming and review problems are also presented that ensure a broad coverage of topics. Cay will also add sections on problem solving and a new more approachable and visual design developed for JfE and BJLO is used. [Big Java](#) Horstmann, [Big Java](#) Cay S.
