Mosby's Respiratory Care Equipment - E-Book J. M. Cairo, 2021-09-16 Master the equipment devices and techniques used in respiratory therapy Mosby's Respiratory Care Equipment 11th Edition provides a comprehensive guide to treating patients with cardiopulmonary dysfunction Using a how to approach this text helps you learn to identify and select equipment understand its operation and apply your knowledge to clinical practice It also discusses assessment testing protocols and troubleshooting of the devices used in airway management Written by noted educator J M Cairo and a team of expert contributors this leading text provides the skills that will help you breathe easier as you prepare for NBRC examinations Unique Clinical approach provides a how to approach to identifying equipment understanding how it works and applying the information in clinical practice Unique Organization of ventilators by application area and manufacturer makes it easier to learn review and locate ventilator information Unique Infection Control chapter reviews microbiology and infection control a topic that RTs must understand to prevent healthcare associated infections and discusses infection control in mass casualty situations Unique Clinical Scenario boxes address problems that may be encountered during actual use of equipment and raise clinically relevant questions with suggested answers on the Evolve companion website Learning features include chapter outlines learning objectives key terms chapter introductions and bulleted key point summaries to identify and reinforce the most important material in each chapter Chapter review questions at the end of every chapter reinforce your comprehension using NBRC style multiple choice or critical thinking questions to match the types of questions covered on the NBRC exams Unique Historical Notes boxes highlight clinically relevant and valuable historical information on respiratory care equipment Excerpts of Clinical Practice Guidelines CPGs statements of care developed by the AARC provide important information regarding indications contraindications hazards and complications assessment of need assessment of outcome and monitoring Glossary of key terms is listed in the back of the book for quick reference NEW Updated clinical scenarios are added throughout the text which incorporate clinical practice guidelines AARC AECC CCM and reflect NBRC exam outlines NEW Updated end of chapter questions include additional clinical data which also incorporate clinical practice guidelines AARC AECC CCM and reflect NBRC exam outlines NEW Coverage of infant and pediatric ventilators is now included in the Mechanical Ventilators General Use Devices chapter NEW Updated Transport Home Care and Noninvasive Devices chapter includes the use of mechanical ventilators in alternative sites e g air transport and long term acute care LTAC facilities

Mosby's Respiratory Care Equipment J. M. Cairo, PhD, RRT, FAARC, 2013-07-29 A comprehensive overview of the equipment and techniques used by respiratory therapists to treat cardiopulmonary dysfunction Mosby's Respiratory Care Equipment 9th edition provides a how to approach that moves beyond technical descriptions of machinery Learn to identify equipment understand how it works and apply your knowledge to clinical practice The 9th edition includes streamlined information on the latest ventilators a new chapter on simulation learning devices and additional easy to access

content on the Evolve site Unique List of Ventilators organized by application area and manufacturer make review and research quick and easy Unique Clinical Approach provides you with a how to approach to identifying equipment understanding how it works and applying the information in clinical practice Excerpts of Clinical Practice Guidelines CPGs give you important information regarding indications contraindications hazards and complications assessment of need assessment of outcome and monitoring Unique Sleep Diagnostics chapter discusses sleep and the impact of sleep disorders on cardiopulmonary function Unique Infection Control chapter provides a review of this critical topic that RTs must understand to prevent health care associated infections Unique Cardiovascular Diagnostics chapter provides a review in an area where RTs are treating an increasing number of cardiovascular cases NBRC style Self Assessment Questions at the end of every chapter prepares you for credentialing exams Unique Clinical Scenario boxes formerly Clinical Rounds allow you to apply material learned to a clinical setting Unique Historical Notes boxes present educational and or clinically relevant and valuable historical information of respiratory care equipment NEW Streamlined ventilator coverage presents information on the most often used devices with more tables and bulleted lists for easy reference NEW Content focused on the newest and the most popular types of ventilators including transport home care alternative setting and neonatal pediatric NEW Evolve site allows access to information that isn't easily found in other texts or manuals including older or outdated ventilators that are still in use today NEW Focus to align Learning Objectives Key Points and Assessment Questions

Mechanical Ventilation David C. Shelleady, Jay I. Peters, 2019-03-28 Mechanical Ventilation provides students and clinicians concerned with the care of patients requiring mechanical ventilatory support a comprehensive guide to the evaluation of the critically ill patient assessment of respiratory failure indications for mechanical ventilation initiation of mechanical ventilatory support patient stabilization monitoring and ventilator discontinuance The text begins with an introduction to critical respiratory care followed by a review of respiratory failure to include assessment of oxygenation ventilation and acid base status A chapter is provided which reviews principles of mechanical ventilation and commonly used ventilators and related equipment Indications for mechanical ventilation are next discussed to include invasive and non invasive ventilation Ventilator commitment is then described to include establishment of the airway choice of ventilator mode of ventilation and initial ventilator settings Patient stabilization is then discussed

Manual of Neonatal Respiratory Care Steven M. Donn, Mark C. Mammel, Anton H.L.C. van Kaam, 2022-05-09 Respiratory care is the largest overall component of neonatal intensive care and the fifth edition of the Manual of Neonatal Respiratory Care is the leading bedside guide for all aspects of respiratory care in the neonatal intensive care unit Its easy to read outline format is simple yet comprehensive and covers all aspects of lung disease in the newborn infant including embryology principles of mechanical ventilation procedures and techniques monitoring devices adjunctive therapies management of respiratory illness complications outcomes and related issues The latest edition includes fully revised and updated information coverage on new equipment and devices and an expanded

authorship to enhance its international appeal The new edition also features two new co editors Dr Mark Mammel and Dr Anton Van Kaam internationally recognized experts in the field who bring a fresh perspective to the manual Divided into sixteen sections the book begins with a section on lung development and maldevelopment specifically covering the development of the respiratory system malformations deformations disorders of the neonatal airway and developmental lung anomalies The second section reviews the principles of mechanical ventilation with coverage on such topics as spontaneous breathing oxygen therapy oxygen toxicity pulmonary mechanics and ventilator parameters The third section of the manual outlines procedures and techniques including neonatal resuscitation laryngoscopy and endotracheal intubation and tracheostomy The following section dives into the monitoring of the ventilated patient specifically focusing on continuous monitoring techniques clinical controversies in pulse oximetry and echocardiography The next section spotlights noninvasive ventilatory techniques such as nasal interfaces humidified high flow nasal cannula therapy and sustained inflation The sixth section of the manual focuses on ventilatory modes and modalities with coverage on intermittent mandatory ventilation pressure support ventilation and pressure control ventilation The following section segues into high frequency ventilation reviewing general concepts high frequency jet ventilation and high frequency oscillatory ventilation The eighth section centers around commonly used neonatal ventilators such as the DRAEGER VN500 ventilator the AVEA ventilator and the Twinstream ventilator The ninth section reviews adjunctive therapies including hemodynamic support nutritional support the use of sedation and analgesia inhaled nitric oxide therapy and ECMO The tenth section shifts gears to spotlight the management of common neonatal respiratory diseases with chapters on mechanisms of respiratory failure tissue hypoxia respiratory distress syndrome persistent pulmonary hypertension and pulmonary hypoplasia agensis among others Section eleven reviews the etiology pathogenesis and management of bronchopulmonary dysplasia as well as the long term outcome of newborns with this chronic lung disease The next section presents complications associated with mechanical ventilation such as thoracic air leaks neonatal pulmonary hemorrhage and neurologic complications The following two sections spotlights ethical legal and other considerations among them nursing care of the ventilated infant long term ventilator dependency home ventilation withdrawal of ventilatory support and medical liability and risk management The fifteenth section focuses on research and literature with coverage on interpreting medical literature data collection and assessment of respiratory outcomes and contemporary classics in neonatal respiratory care The final section presents ventilatory case studies The text also features over 300 high yield radiographic images figures tables and algorithms

Respiratory Care Clinical Competency Lab Manual Sandra T Hinski, 2013-12-10 Respiratory Care Clinical Competency Lab Manual provides the practical skills needed to apply classroom theory to clinical practice This text has the flexibility to be used in conjunction with all other respiratory care titles as well as in other disciplines that require competencies in respiratory therapy With detailed step by step procedures supporting procedural illustrations hands on lab exercises case studies and critical thinking

questions this text helps you understand and apply theoretical knowledge by demonstrating specific skills Procedural competency evaluation forms help you to assess your progress and performance of specific procedures Detailed structured lab activities provide hands on opportunities to assess psychomotor and patient communication skills in a controlled environment Content correlation to NBRC combined CRT RRT exam content outlines helps you better prepare for credentialing exams Step by step procedural competencies prepare you for the RT competency areas established by the American Association of Respiratory Care AARC and meet the national practice standards for patient care Up to date coverage of current technology equipment Clinical Practice Guidelines CPGs CPR guidelines and CDC recommendations and mass casualty disaster management equips you with the most state of the art training for respiratory care Integration of case based questions within the lab activities helps you develop and promote your critical thinking abilities UNIQUE Coverage of polysomnography addresses clinical evaluation in this expanding specialty area Over 200 images provide visual guidance on how to perform procedures UNIQUE Reality Check boxes arm you with practical knowledge on real world application of various procedures UNIQUE Tip boxes supply you with helpful pointers for the clinical arena Glossary of terms offers quick reference to terms presented in the text

Manual of Pediatric Intensive Care Mr. Rohit Manglik, 2024-07-24 Covers principles and protocols of pediatric critical care including ventilation fluid therapy and emergency interventions ideal for pediatricians and nurses

The ESC Textbook of Intensive and Acute Cardiovascular Care Marco Tubaro, Pascal Vranckx, Susanna Price, Christiaan Vrints, 2015 The ESC Textbook of Intensive and Acute Cardiovascular Care is the official textbook of the Acute Cardiovascular Care Association ACCA The new edition continues to approach issues on Intensive and Acute Cardiac Care for not only cardiologists intensivists and critical care specialists but emergency physicians and healthcare professionals too

Perinatal and Pediatric Respiratory Care - E-Book Brian K. Walsh, Michael P. Czervinske, Robert M. DiBlasi, 2013-08-13 With the in depth coverage you need this text helps you provide quality treatment for neonates infants and pediatric patients It discusses the principles of neonatal and pediatric respiratory care while emphasizing clinical application Not only is this edition updated with the latest advances in perinatal and pediatric medicine but it adds a new chapter on pediatric thoracic trauma plus new user friendly features to simplify learning A comprehensive approach covers all of the major topics of respiratory care for neonates infants and children including both theory and application Exam preparation is enhanced by the inclusion of the content in the exam matrix for the NBRC's neonatal pediatric specialty exam A streamlined logical organization makes it easy to build a solid foundation of knowledge Unique Pediatric Thoracic Trauma chapter focuses on common forms of thoracic trauma a condition that accounts for 5-10% of admissions to pediatric trauma centers Learning objectives at the beginning of each chapter highlight what you should learn by breaking down key content into measurable behaviors criteria and conditions Assessment questions in each chapter are written in the NBRC multiple choice style as found on the neonatal and pediatric specialty exam with answers page
