Bioremediation for Environmental Pollutants Inamuddin, 2023-04-26 Increased industrial and agricultural activity has led to the contamination of the earth's soil and groundwater resources with hazardous chemicals The presence of heavy metals dyes fluorides dissolved solids and many other pollutants used in industry and agriculture are responsible for hazardous levels of water pollution The removal of these pollutants in water resources is challenging Bioremediation is a new technique that employs living organisms usually bacteria and fungi to remove pollutants from soil and water preferably in situ This approach is more cost effective than traditional techniques such as incineration of soils and carbon filtration of water It requires understanding how organisms consume and transform polluting chemicals survive in polluted environments and how they should be employed in the field Bioremediation for Environmental Pollutants discusses the latest research in green chemistry and practices and principles involved in quality improvement of water by remediation It covers different aspects of environmental problems and their remedies with up to date developments in the field of bioremediation of industrial environmental pollutants Volume 1 focuses on the bioremediation of heavy metals pesticides textile dyes removal petroleum hydrocarbon microplastics and plastics This book is invaluable for researchers and scientists in environmental science environmental microbiology and waste management It also serves as a learning resource for graduate and undergraduate students in environmental science microbiology limnology freshwater ecology and microbial biotechnology

Environmentally Benign Approaches for Pulp Bleaching Pratima Bajpai, 2005-09-23 1 Introduction 2 General background 3 Options for environmentally benign bleaching 4 ECF and TCF bleaching 5 Chlorine free bleaching of secondary fibers 6 Closed cycle bleach plant

Lignocellulosic Biomass Production and Industrial Applications Arindam Kuila, Vinay Sharma, 2017-05-11 This book covers the utilization of lignocellulosic biomass for biofuel production as well as other industrial applications such as in biotechnology paper and pulp chemical and bioplastics Lignocellulosic materials such as agricultural residues e g wheat straw sugarcane bagasse corn stover forest products hardwood and softwood and crops such as switchgrass and salix are becoming a potent source for generating valuable products Lignocellulosic Biomass Production and Industrial Applications describes the utilization of lignocellulosic biomass for various applications Although there have been numerous reports on lignocellulosic biomass for biofuel application there have been very few other applications reported for lignocellulosic biomass based biotechnology chemicals and polymers This book covers both application areas Besides describing the various types of biofuel production such as bioethanol biobutanol

biodiesel and biogas from lignocellulosic biomass it also presents various other lignocellulosic biomass biorefinery applications for the production of enzymes chemicals polymers paper and bioplastics In addition there are chapters on valorization of lignocellulosic materials alkali treatment to improve the physical mechanical and chemical properties of lignocellulosic natural fibers and a discussion of the major benefits limitations and future prospects of the use of lignocellulosic biomass

Chemistry for Biomass Utilization Raimo Alén,2023-12-04 Much interest has been directed to the versatile possibilities of using lignocellulosic biomass resources i e renewable raw materials for the full scale production of various chemicals and other bioproducts together with solid liquid and gaseous fuels Introduces modern aspects and various technologies of lignocellulosic biomass conversion for producing chemicals biofuels and other products in a reader friendly way Starting with fundamentals of biorefi nery the author further describes chemical biochemical and thermal conversion approaches In addition the properties and biorefining principles of non wood biomass feedstock

Agricultural Biomass Based Potential Materials Khalid Rehman Hakeem,Mohammad Jawaid,Othman Y. Alothman,2015-04-01

Agricultural biomass is abundant worldwide and it can be considered as alternative source of renewable and sustainable materials which can be used as potential materials for different applications Despite this enormous production of agricultural biomass only a small fraction of the total biomass is utilized for different applications Industry must be prepared to take advantage of the situation and utilize the available biomass in the best possible manner Agricultural biomass such as natural fibres has been successfully investigated as a great potential to be used as a renewable and sustainable materials for the production of composite materials Natural fibres offer excellent specific properties and have potential as outstanding reinforcing fillers in the matrix and can be used as an alternative material for biocomposites hybrid composites pulp and paper industries Natural fibre based polymer composites made of jute oil palm flex hemp kenaf have a low market cost attractive with respect to global sustainability and find increasing commercial use in different applications Agricultural biomass based composites find applications in a number of fields viz automotive industry and construction industry Future research on agricultural biomass natural fibre based composites should not only be limited to its automotive applications but can be explored for its application in aircraft components construction industry rural housing and biomedical applications In this book we will cover the chemical physical thermal electrical and biodegradability properties of agricultural biomass based composite materials and its different potential applications The main goal of this volume is to familiarize researchers scientists and engineers with the unique research opportunities and potentials of agricultural biomass based materials Up to date information on alternative biomass utilization Academic and industry leaders discuss unique properties of biomass based composite materials Direct application of agricultural biomass materials as sustainable and renewable alternatives

If you ally obsession such a referred **Handbook For Pulp And Paper Technologists** ebook that will give you worth, acquire the certainly best seller from us currently from several preferred authors. If you desire to witty books, lots of novels, tale, jokes, and more fictions collections are after that launched, from best seller to one of the most current released.

You may not be perplexed to enjoy every book collections Handbook For Pulp And Paper Technologists that we will utterly offer. It is not on the subject of the costs.
