Njoroge, 2019-04-02 This book provides a clinical guide to the psychiatric assessment of infants and young children birth through five years and their families. It offers a comprehensive data-rich framework for conducting mental health assessments of infants, toddlers, and preschoolers. The book includes a step-by-step guide for evaluation and assessment, reviewing relevant literature, and best practices for working with very young children. It begins with an overview of the purpose and principles of psychiatric assessment and offers a protocol for planning and executing a thorough evaluation. Chapters examine critical aspects of the assessment process, including children's relationships with parents, caregivers, assessment of parents, cultural considerations, and play behaviors. Chapters also provide illustrative case vignettes and information on specialized tools that can be adapted for use in a private office or training clinic. Topics featured in this book include: Play-based assessment models for accessing the inner world of young children; The effect of caregivers and their reflective functioning on the mental health of young children; The use of adult report rating scales in the clinical assessment of young children; Psychopharmacologic considerations in early childhood. *The Clinical Guide to Psychiatric Assessment of Infants and Young Children* is a must-have resource for researchers, clinicians, and related professionals and graduate students in infancy and early childhood development, pediatrics, social work, psychiatry, and public health. Essa and new co-author Melissa Burnham provide valuable insight by strategically dividing the book into six sections that answer the What, Who, Why, Where, and How of early childhood education. Utilizing both NAEYC (National Association for the Education of Young Children) and DAP (Developmentally Appropriate Practice) standards, this supportive text provides readers with the skills, theories, and best practices needed to succeed and thrive as early childhood educators. Troy, 2020-03-13 Now in a revised and

updated fourth edition this trusted text and professional resource provides a developmental framework for clinical practice. The authors examine how children's trajectories are shaped by transactions among family relationships, brain development, and the social environment. Risk and resilience factors in each of these domains are highlighted. Covering infancy, toddlerhood, the preschool years, and middle childhood, the text explores how children of different ages typically behave, think, and relate to others. Developmentally informed approaches to assessment and intervention are illustrated by vivid case examples. Observation exercises and quick reference summaries of each developmental stage facilitate learning. New to This Edition: Incorporates a decade's worth of advances in knowledge about attachment, neurodevelopment, developmental psychopathology, intervention science, and more. Toddler, preschool, and school-age development are each covered in two succinct chapters rather than one, making the book more student-friendly. Updated throughout by new coauthor Michael F. Troy while retaining Douglas Davies's conceptual lens and engaging style.
