Tommie Forslund, Robbie Duschinsky, 2021-03-29 As interest in attachment theory continues to grow, misconceptions of the theory are becoming increasingly common. Important texts on major theoretical and empirical contributions are often too extensive for non-specialist readers or not readily available to clinicians. Designed to address a significant gap in literature, *Attachment Theory and Research: A Reader* presents a carefully curated selection of book chapters and journal articles on the subject, complemented by previously unpublished material by the founder of the theory. This valuable new resource provides practitioners, students, policymakers, and general readers an accessible and up-to-date view of the concepts, development, and diversity of attachment theory. The Reader comprises 15 succinct chapters by many of the most influential researchers in the theory, covering the basis of attachment theory and the current state of the field. The book brings together a wide range of works, many of which challenge common assumptions and offer intriguing new insights on attachment theory and research. Topics include psychoanalytic theories of separation anxiety, concepts of anxiety, stress, and homeostasis, the origins of disorganized attachment, cultural differences in caregiving practices, reactive attachment disorder, RAD, and disinhibited social engagement disorder, DSED, the future prospects of attachment theory, and more.

Attachment in Middle Childhood

Kathryn A. Kerns, Rhonda A. Richardson, 2005-01-03 With contributions from leading investigators the book explores the effects on attachment of a wide range of factors in middle childhood including children's broadening network of social relationships. Compelling data are presented on whether the quality of attachment in middle childhood can be predicted by assessments earlier in life and what may explain changes over time. **BOOK JACKET** [Religion and Family Links](#) Donald Swenson, 2008-01-01 For many the experience of religion and the family are organically connected. First exposure to religion often comes through the family and in families that practice a religion it often has a shaping effect on their traditions, roles, practices or structure. The author of this text captures the important relationship between religion and the family with a review of relevant literature on the subject synthesizing it within a theoretical framework. The work begins with an introduction to the neofunctionalist theoretical framework of the family. This framework is connected to a multidimensional understanding of religion. With a focus on systems and a holistic interpretation of religion the author uses a systems approach to construct a synthesis of the salient literature on the link between religion and the family. Four systems that are embedded in the Neofunctionalist theoretical framework are presented: the chronosystem including time and history, the organic system that which is part of our biology, the personality system with an accent on the individual in social context, the social system everything to do with relationships and social organizations and the cultural system including mythology and ethos. The concepts from religion that create a unity include the idea of the sacred, religious experience, ritual, ethos and sacred organizations. Another feature of the text is that it is not restricted to the modern era. Much of the research is historical in nature that assists the reader in understanding links of the two social phenomena in the light of the past. Further, whenever appropriate literature will be drawn from folk religion, Christianity, Judaism and Islam. **Encyclopedia of Human Relationships** Harry T. Reis, 2009-03-25 This encyclopedia provides a structure to understand the essential rudiments of human behaviour and interpersonal relationships. [Rethinking Attachment for Early Childhood Practice](#) Sharne A Rolfe, 2020-08-05 Sharne Rolfe brings an excellent discussion of attachment principles, research and applications to an exceedingly important topic: the relationships between child care teachers, providers and young children. It is an important resource for the current and next generation of early childhood professionals and researchers and it will be a key resource for the growing international discussion about child care teacher/provider and child relationships. Helen H. Raikes PhD, The Gallup Organization and Society for Research in Child Development, Consultant Administration for Children and Families USA, a timely synthesis of current knowledge concerning attachment and its implications for contemporary practice, highly relevant for use in college and university early childhood programs and a valuable resource for directors and staff in children's services. Alan Hayes, Professor of Early Childhood Studies, Macquarie University, particularly valuable in highlighting the crucial importance of taking a relationship-based approach when working with young children. Pam Linke, Manager, Centre for Parenting Child and Youth Health, South Australia. This accessible and lively exploration of the importance of attachment

for infants young children and their parents should be essential reading for all professional caregivers and for policy makers concerned with the mental health and well being of our future generation Ruth Schmidt Neven Director Centre for Child and Family Development In heated debates about whether childcare damages young children attachment theory has been seen as anti childcare Rolfe rethinks this perception demonstrating instead that understanding attachment is essential to good childcare practice Rethinking Attachment offers a thorough explanation of attachment theory and explains how security autonomy and resilience in young children can be promoted in childcare settings through a sound understanding of attachment principles With examples drawn from practice Rolfe examines the relationships between children and their carers between parents and carers and between carers themselves She also shows how secure attachment relationships with parents and carers influence transitions to childcare preschool and school
