Medical Social Work In Singapore: Context And Practice Geok Ling Lee, Soon Noi Goh, 2020-09-17 Medical social work in Singapore traces its roots to the post war period This textbook documents the historical development and evolution of the medical social work profession in Singapore as well as the specialist work done in the profession The first part of the book gives an overview to the field in Singapore It provides information which is considered as fundamental and core to medical social workers across the various medical or healthcare settings The second part focuses on the selected practice areas and adopts an integral approach to discuss theory and practice This book is essential for social work students who wish to learn from a range of examples of good social work practice presented from human developmental perspectives and in sufficient breadth to provide a reasonable overview of social work practice in health care This book also provides added lens for medical nursing and other allied health students and practitioners who wish to better understand their patients and families

Social Work, Mental Health, and Public Policy in Diverse Contexts Sheying Chen, 2023-08-29 The discipline of social policy oftentimes deemed a part of social work as a profession was born in the West Unlike social policy that started with the post war idea of a welfare state in the mid 20th

century social work traces its roots to individual casework pioneered by the Charity Organization Society COS early social administration including state wide poverty relief an advocacy effort of the COS but with deep roots in the English Poor Laws of the 17th century and social action emphasizing political activities to improve social conditions originating from the Settlement House Movement which began in the 1880s The development of social work is historically intertwined with that of public welfare philanthropy and charity and is an inherently international subject This conception is broader than international social work as a discrete field of professional practice which crosses geopolitical borders and all levels of social and economic organizations with a focus on development However each nation has a story of its own in terms of professionalization of social work in the evolution of public welfare and philanthropic charitable undertaking within its particular economic political social and cultural settings A wide ranging and in depth study of various especially non Western country cases is essential to an adequate comprehensive understanding of the social work profession which is also a basic requirement of its value of diversity China is undoubtedly an important case with the largest population on earth It s also unique in view of so called Chinese characteristics which are sometimes fundamentally different from other particularly Western societies It s even intriguing given the country s lengthy complex history and its recent rapid rise to a global superpower with a claim of national goals and core values that seem to be rather considerable to social work as a helping profession Therefore any significant lessons learned from the Chinese experiences would help with a better international understanding and further advancement of social work and public welfare at a global scale
