Handbook Of Behavior Modification With The Mentally Retarded Nato Science Series B:

Handbook of Behavior Modification with the Mentally Retarded Johnny L. Matson, 2013-06-05 The development of behavior modification principles and procedures and the ensuing research have had a dramatic impact on services for mentally retarded persons This book is the second edition of a volume that is designed to update readers on some of these many developments Although many of the chapter titles and authors from the first edition remain unchanged we have added additional chapters to reflect new areas of research The book is thus a critical review of this literature and as such provides essential and important notions about what we know and what can be done to expand our current knowledge The authors of the chapters are all recognized experts who have been active in publishing in the research areas they critique As a result they have a good understanding of what are the major issues in the field And because they are also active in service provision to persons with identified handicaps their material will be especially useful to practitioners and it is hoped to those professionals who are working in the field in establishing data based treatments One important change in the field has concerned the terminology used to We are aware that persons with mental retardation are no longer referred to as the mentally retarded and although no disrespect is intended for the sake of continuity the original title has been retained on the advice of the publisher *Current Catalog* National Library of Medicine (U.S.), 1983 First multi year cumulation covers six years 1965 70 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), Books in Print ,1994 Books in Series ,1985 Vols for 1980 issued in three parts Series Authors and Titles

Barrett, 2013-11-22 It is well known that behavior problems are a salient characteristic of children and adults with mental retardation That is not to say that all persons with mental retardation experience behavior disorders however most studies indicate that the incidence of emotional disturbance in this population is four to six times greater than that observed in similar intellectually nonhandicapped children and adults It is equally well known that the principal form of treatment accorded clients with mental retardation and behavior disorders is pharmacotherapy or the prescription of behavior modifying drugs Recent studies show that 6 out of every 10 individuals with mental retardation have been prescribed drugs as treatment for disorders of emotion or behavior Unfortunately further studies indicate that only one or 2 out of every 10 clients receiving medication are determined to be responders such that some therapeutic benefit is derived from their drug treatment As

noted by the title the single major thrust of this volume is to review approaches to the treatment of behavior disorders in persons with mental retardation from a nondrug perspective This requires the presentation of a wide range of material on treatment basic behavior modification programming cognitive behavioral strategies habilitative approaches counseling and psychotherapy designing therapeutic living environments managing medical factors bearing relevance to emotional illness intervening with families training special education teachers and direct care staff and supplying information on the client s rights to obtain treatment in the least restrictive and least intrusive manner *American Scientist* ,1942 **Books and Pamphlets, Including Serials and Contributions to Periodicals** Library of Congress.
