This comprehensive handbook covers all domains of developmental science from a cultural point of view and in all regions of the globe. This contemporary and scholarly resource of culture in development covers theoretical, methodological, substantive, and ethnic issues as well as geographic approaches. Each chapter includes an introduction, historical and demographic considerations, theory, an overview of the most important classical and modern research studies, recommended future directions in theory and research, and a conclusion. The chapters focus on children from the prenatal stage through adolescence. Ideal for those new to the field, readers will appreciate the plethora of cultural examples from all fields of child and human development and developmental examples from all fields of cultural study.
