Cases in European Competition Policy Bruce Lyons, 2009-08-27 Competition between firms is usually the most effective way of delivering economic efficiency and what consumers want However there is a balance to be struck Firms must not be over regulated and so hampered in their development of innovative products and new strategies to compete for customers Nor must they be completely free to satisfy a natural preference for monopoly which would give them higher profits and a quieter life The economic role of competition policy control of anticompetitive agreements mergers and abusive practices is to maintain this balance and an effective policy requires a nuanced understanding of the economics of industrial organization Cases in European Competition Policy demonstrates how economics is used and sometimes abused in competition cases in practical competition policy across Europe Each chapter summarizes a real case investigated by the European Commission or a national authority and provides a critique of key aspects of the economic analysis

Society and the Internet Mark Graham, William H. Dutton, 2019-07-24 How is society being reshaped by the continued diffusion and increasing centrality of the Internet in everyday life and work Society and the Internet provides key readings for students scholars and those interested in understanding the interactions of the Internet and society This multidisciplinary collection of theoretically and empirically anchored chapters addresses the big questions about one of the most significant technological transformations of this century through a diversity of data methods theories and approaches Drawing from a range of disciplinary perspectives Internet research can address core questions about equality voice knowledge participation and power By learning from the past and continuing to look toward the future it can provide a better understanding of what the ever changing configurations of technology and society mean both for the

everyday life of individuals and for the continued development of society at large This second edition presents new and original contributions examining the escalating concerns around social media disinformation big data and privacy Following a foreword by Manuel Castells the editors introduce some of the key issues in Internet Studies The chapters then offer the latest research in five focused sections The Internet in Everyday Life Digital Rights and Human Rights Networked Ideas Politics and Governance Networked Businesses Industries and Economics and Technological and Regulatory Histories and Futures This book will be a valuable resource not only for students and researchers but for anyone seeking a critical examination of the economic social and political factors shaping the Internet and its impact on society *Handbook of Law and Economics, Volume 2* A. Mitchell Polinsky, Steven Shavell, 2007 Law can be viewed as a body of rules and legal sanctions that channel behavior in socially desirable directions for example by encouraging individuals to take proper precautions to prevent accidents or by discouraging competitors from colluding to raise prices The incentives created by the legal system are thus a natural subject of study by economists Moreover given the importance of law to the welfare of societies the economic analysis of law merits prominent treatment as a subdiscipline of economics This two volume Handbook is intended to foster the study of the legal system by economists The two volumes form a comprehensive and accessible survey of the current state of the field Chapters prepared by leading specialists of the area Summarizes received results as well as new developments Source inconneue

EU Competition Law, Data Protection and Online Platforms: Data as Essential Facility Inge Graef, 2016-10-17 All are agreed that the digital economy contributes to a dynamic evolution of markets and competition Nonetheless concerns are increasingly raised about the market dominance of a few key players Because these companies hold the power to drive rivals out of business regulators have begun to seek scope for competition enforcement in cases where companies claim that withholding data is needed to satisfy customers and cut costs This book is the first focus on how competition law enforcement tools can be applied to refusals of dominant firms to give access data on online platforms such as search engines social networks and e commerce platforms commonly referred to as the gatekeepers of the Internet The question arises whether the denial of a dominant firm to grant competitors access to its data could constitute a refusal to deal and lead to competition law liability under the so called essential facilities doctrine according to which firms need access to shared knowledge in order to be able to compete A possible duty to share data with rivals also brings to the forefront the interaction of competition law with data protection legislation considering that the required information may include personal data of individuals Building on the refusal to deal concept and using a multidisciplinary approach the analysis covers such issues and topics as the following data portability interoperability data as a competitive advantage or entry barrier in digital markets market definition and dominance with respect to data disruptive versus sustaining innovation role of intellectual property regimes economic trade off in essential facilities cases relationship of competition enforcement with data protection law and data related competition concerns in merger cases The author draws on a wealth of relevant

material including EU and US decision making practice case law and policy documents as well as economic and empirical literature on the link between competition and innovation The book concludes with a proposed framework for the application of the essential facilities doctrine to potential forms of abuse of dominance relating to data In addition it makes suggestions as to how data protection interests can be integrated into competition policy An invaluable contribution to ongoing academic and policy discussions about how data related competition concerns should be addressed under competition law the analysis clearly demonstrates how existing competition tools for market definition and assessment of dominance can be applied to online platforms It will be of immeasurable value to the many jurists business persons and academics concerned with this very timely subject

Technological Change and Network Effects in Growth Regimes Torsten Heinrich, 2014-06-03 In this new volume it is argued that network effects are much more common than usually assumed and that they have a profound impact on many aspects of economic systems especially technological change and economic growth The analysis and modelling of this interrelationship is the central focus of this book While there exists a vast body of literature on economic growth the theories put forward so far have had limited success in explaining observed patterns of economic growth Growth cycles in particular continue to elude standard economic models though evolutionary economics has made some progress Seeking to fill the gap Torsten Heinrich's innovative approach uses microeconomics to explain heterogeneous sectoral dynamics on the meso level and then aggregating these to observed macroeconomic growth rates In this way it is shown that an evolutionary model of technological change with network effects can explain not only commonly observed asymmetric industry structures monopolies and oligopolies but also growth cycles The book includes a comprehensive account of the most influential economic growth theories a discussion of the research on network effects as well as an introduction to the methodology the model and a case study on the recent emergence of information and communication technology This important new volume will be relevant to all those interested in theoretical economics growth theory innovation economics agent based modelling and industry dynamics

Promoting Competition in Innovation Through Merger Control in the ICT Sector Kalpana Tyagi, 2019-06-21 This book addresses the question of how competition authorities assess mergers in the Information Communication Technology ICT sector so as to promote competition in innovation A closer look at the question reveals that it is far more complex and difficult to answer for the ICT telecommunications and multi sided platform MSP economy than for more traditional sectors of the economy This has led many scholars to re think and question whether the current merger control framework is suitable for the ICT sector which is often also referred to as the new economy The book pursues an interdisciplinary approach combining insights from law economics and corporate strategy Further it has a comparative dimension as it discusses the practices of the US the EU and wherever relevant of other competition authorities from around the globe Considering that the research was conducted in the EU the practices of the European Commission remain a key aspect of the content Considering its normative dimension the book concentrates on the substantive aspects of

merger control To facilitate a better understanding of the most important points the book also offers a brief overview of the procedural aspects of merger control in the EU the US and the UK and discusses recent amendments to Austrian and German law regarding the notification threshold Given its scope the book offers an invaluable guide for competition law scholars practitioners in the field and competition authorities worldwide

Combating Corruption and Collusion in Public Procurement Robert D. Anderson, Alison Jones, William E. Kovacic, 2024-03-06 Corruption in public procurement typically involves procurement decisions taken in favour of preferred bidders in exchange for improper compensation the acceptance of bribes for example while supplier collusion refers to a type of cartel activity in which firms rig their bids in a tendering process Although these practices are distinct they frequently occur together in the public procurement context reinforcing one another

Combating Corruption and Collusion in Public Procurement A Challenge for Governments Worldwide examines the causes of corruption and collusion in the public procurement sphere its resulting harm and how states can best try to combat these practices This book provides a legal economic and practical analysis of issues concerning corruption and supplier collusion in public procurement both generally and in seven diverse and representative jurisdictions the United Kingdom the United States Brazil Hungary and Poland Ukraine and Canada It encompasses a discussion of both generic cross jurisdictional issues and specific proposals for individual jurisdictions It offers practical guidance on building robust regimes for combatting corruption and collusion in public procurement and how to bolster and improve them when they are faltering The book stresses the need for a multi faceted and joined up approach to the problems emphasizing the importance both of enhanced investment in the effective enforcement of anti corruption and cartel laws and of increasing the resilience of public procurement systems to corruption and collusion through a range of measures The relevance of the topic to the social and economic well being of citizens and the survival of democratic governance is highlighted throughout the book

Pioneering and comprehensive Combating Corruption and Collusion in Public Procurement provides a pathbreaking analysis of a range of global issues making it an essential read for scholars lawyers government officials and representatives of international and non governmental organizations around the world
