Cultural Studies and Environmentalism Deborah J. Tippins,Michael P. Mueller,Michiel van Eijck,Jennifer D Adams,2010-08-05 As the first book to explore the confluence of three emerging yet critical fields of study this work sets an exacting standard The editors aim was to produce the most authoritative guide for ecojustice place based education and indigenous knowledge in education Aimed at a wide audience that includes but is not restricted to science educators and policymakers Cultural Studies and Environmentalism starts from the premise that schooling is a small part of the larger educational domain in which we live and learn Informed by this overarching notion the book opens up ways in which home grown talents narratives and knowledge can be developed and eco region awareness and global relationships can be facilitated Incorporating a diversity of perspectives that include photography poetry and visual art the work provides a nuanced lens for evaluating educational problems and community conditions while protecting and conserving the most threatened and vulnerable narratives Editors and contributors share the view that the impending loss of these narratives should be discussed much more widely than is currently the case and that both teachers and children can take on some of the responsibility for their preservation The relevance of ecojustice to this process is clear Ecojustice philosophy is a way of learning about how we frame or perceive the world around us and why that matters Although it is not synonymous with social

or environmental justice the priorities of ecojustice span the globe in the same way It incorporates a deep recognition of the appropriateness and significance of learning from place based experiences and indigenous knowledge systems rather than depending on some urgent ecological crises to advocate for school and societal change With a multiplicity of diverse voices coming together to explore its key themes this book is an important starting point for educators in many arenas It brings into better focus a vital role for the Earth's ecosystems in the context of ecosociocultural theory and participatory democracy alike Encompassing theoretical empirical and experiential standpoints concerning place based knowledge systems this unique book argues for a transformation of science education's intellectual tradition of thinking that emphasizes individual cognition In its place the book offers a wisdom tradition of thinking living and being that emphasizes community survival in harmony within itself and with Mother Earth Glen Aikenhead **Forthcoming Books** Rose Arny, 2002 **Educating Teachers for Diversity** Jacqueline Jordan Irvine, 2003-05-08 Offers advice for closing the achievement gap of low income African American students in urban schools Focuses on issues of assessment for K 12 students and teachers of color Explores the declining number of teachers of color in the United States and its relation to school failure among African American and Latino students Outlines a curriculum for teacher education programs to help them produce culturally aware and effective teachers Examines how colleges of education can reverse the cycle of failure for students of color by producing teachers who are culturally responsive Concludes with a summary of the work and recommendations of such scholars as James A Banks and Sonia Nieto *Participatory Action Research and Educational Development* Huma Kidwai, Radhika Iyengar, Matthew A. Witenstein, Erik Jon Byker, Rohit Setty, 2017-04-11 This volume brings together diverse thinkers and practitioners on Participatory Action Research PAR and educational development in South Asia Contributors draw from their research and field experiences on how PAR is currently being understood theorized debated and implemented for education of children in South Asia This book will act as a key reference text for academics students and practitioners interested in the intersection of education and participatory development in the region The book opens a constructive debate on PAR approaches to education and proposes a reflective framework that allows the reader to develop their perspectives about the conceptual methodological and sociopolitical potential and limitations of participatory approaches *A Turning Point in Teacher Education* James D. Kirylo, Jerry Aldridge, 2019-01-25 Since teacher education looked to become a formal field of study in the 1800s it has historically contended with competing forces in the effort to solidify its professional identity Currently that contention is juxtaposed with those external forces that look to promote fast track teacher training with its ultimate goal to dismantle traditional teacher education programs and those internal forces whereby teacher education within itself continues to struggle with its own identity power and influence To that end this book *A Turning Point in Teacher Education A Time for Resistance Reflection and Change* suggests we have reached a climax point a turning point in teacher education meaning we must work to resist and denounce those external forces that are laboring to undermine the professionalization of what it

means to be a teacher Simultaneously we must also deeply reflect and be clear about those internal forces at work when it comes to solidifying the place power and necessity of traditional teacher education programs ultimately announcing the furthering of what should be Our Place on Campus Ronni L. Sanlo,Sue Rankin,Robert Schoenberg,2002-06-30 This book provides guidelines for establishing and operating LGBT centers or program offices on college and university campuses
