Lievrouw, Sonia M. Livingstone, 2006-01-17 Thoroughly revised and updated this Student Edition of the successful Handbook of New Media has been abridged to showcase the best of the hardback edition This Handbook sets out boundaries of new media research and scholarship and provides a definitive statement of the current state of the art of the field Covering major problem areas of research the Handbook of New Media includes an introductory essay by the editors and a concluding essay by Ron Rice Each chapter written by an internationally renowned scholar provides a review of the most significant social research findings and insights *Computer-mediated Communication in Personal Relationships* Kevin B. Wright, Lynne M. Webb, 2011 Lynne M. Webb Ph D University of Oregon is Professor in Communication at the University of Arkansas She previously served as a tenured faculty member at the Universities of Florida and Memphis Her research examines young adults interpersonal communication in romantic and family contexts Her research appears in over 50 essays published in scholarly journals and

edited volumes including computers in Human Behavior Communication Education Health Communication and Journal of Family Communication Book Jacket **The Oxford Handbook of Internet Studies** William H. Dutton, 2013-01-10 The Handbook is a landmark in the dynamic and rapidly expanding field of Internet Studies bringing together leading international scholars to strengthen research on how the Internet has been studied and the discipline's fundamental questions and shape research policy and practice for the future The Social Dynamics of Information and Communication Technology Leslie Haddon, 2016-03-03 What shapes the role of Information and Communication Technologies in our everyday life Despite the speed with which information and communication technologies such as the PC mobile telephone and internet have found their way into society there remains a good deal of debate surrounding their adoption and use Through empirical studies covering a broad range of everyday life and work settings this volume provides grounded insights into the social dynamics influencing how ICTs are both shaped and experienced Specifically the book examines the contributions of diverse disciplines to our understanding of these processes the symbolic nature of technologies the influence of design on the experience of ICTs the role of users in influencing that design the social constraints affecting the use of those technologies and strategies for evaluating the social consequences of ICT innovations **The Discourse of YouTube** Phil Benson, 2016-10-26 The Discourse of YouTube explores the cutting edge of contemporary multimodal discourse through an in depth analysis of structures processes and content in YouTube discourse YouTube is often seen as no more than a place to watch videos but this book argues that YouTube and YouTube pages can also be read and analysed as complex multi authored multimodal texts emerging dynamically from processes of textually mediated social interaction The objective of the book is to show how multimodal discourse analysis tools can help us to understand the structures and processes involved in the production of YouTube texts Philip Benson develops a framework for the analysis of multimodality in the structure of YouTube pages and of the multimodal interactions from which their content emerges A second and equally important objective is to show how the globalization of YouTube is central to much of its discourse The book identifies translingual practice as a key element in the global discourse of YouTube and discusses its roles in the negotiation of identities and intercultural learning in videos and comments Focusing on YouTube as a key example of new digital media The Discourse of YouTube makes a substantial contribution to conversations about new ways of producing multimodal text in a digital world

Interactive Cultural Heritage and Arts* Matthias Rauterberg, 2021-07-03 The two volume set LNCS 12794 12795 constitutes the refereed proceedings of the 9th International Conference on Culture and Computing C technology and art visitors experiences in digital culture Part II Design thinking in cultural contexts digital humanities new media and culture perspectives on cultural computing New Media in New Europe-Asia Jeremy Morris, Natalya Rulyova, Vlad Strukov, 2016-04-14 This volume offers an in depth investigation of the role of new media in the political social and cultural life in the region of Europe Asia By focusing on new media which is understood primarily as internet enabled networked social practice the book puts forward a political and cultural redefinition of the region which is determined by the recognition of the diversity of new media uses in the countries included in the study This book focuses on the period prior to the advent of world internet revolutions and it registers the region at its pivotal moment at the time of its entry into the post broadcast era Does the Internet aid democratisation or it conditioned by socio political norms Has the Internet changed politics or has it had to fit existing political structures Has the use of digital technologies revolutionized election campaigns How is hyperlinked society different from society prior to the advent of the web How do ordinary people actually use the Internet These and other pressing questions crucial to understanding the post socialist world are investigated in the current volume This book was published as a special issue of Europe Asia Studies **Wired Shut** Tarleton Gillespie, 2009-09-18 How the shift toward technical copy protection in the battle over digital copyright depends on changing political and commercial alignments that are profoundly shaping the future of cultural expression in a digital age While the public and the media have been distracted by the story of Napster warnings about the evils of piracy and lawsuits by the recording and film industries the enforcement of copyright law in the digital world has quietly shifted from regulating copying to regulating the design of technology Lawmakers and commercial interests are pursuing what might be called a technical fix instead of specifying what can and cannot be done legally with a

copyrighted work this new approach calls for the strategic use of encryption technologies to build standards of copyright directly into digital devices so that some uses are possible and others rendered impossible In *Wired Shut* Tarleton Gillespie examines this shift to technical copy protection and its profound political economic and cultural implications Gillespie reveals that the real story is not the technological controls themselves but the political economic and cultural arrangements being put in place to make them work He shows that this approach to digital copyright depends on new kinds of alliances among content and technology industries legislators regulators and the courts and is changing the relationship between law and technology in the process The film and music industries he claims are deploying copyright in order to funnel digital culture into increasingly commercial patterns that threaten to undermine the democratic potential of a network society In this broad context Gillespie examines three recent controversies over digital copyright the failed effort to develop copy protection for portable music players with the Strategic Digital Music Initiative SDMI the encryption system used in DVDs and the film industry's legal response to the tools that challenged them and the attempt by the FCC to mandate the broadcast flag copy protection system for digital television In each he argues that whether or not such technical constraints ever succeed the political alignments required will profoundly shape the future of cultural expression in a digital age

Children in the Online World Elisabeth Staksrud, 2016-05-23 What is online risk How can we best protect children from it Who should be responsible for this protection Is all protection good Can Internet users trust the industry These and other fundamental questions are discussed in this book Beginning with the premise that the political and democratic processes in a society are affected by the way in which that society defines and perceives risks *Children in the Online World* offers insights into the contemporary regulation of online risk for children

including teens examining the questions of whether such regulation is legitimate and whether it does in fact result in the sacrifice of certain fundamental human rights The book draws on representative studies with European children concerning their actual online risk experiences as well as an extensive review of regulatory rationales in the European Union to contend that the institutions of the western European welfare states charged with protecting children have changed fundamentally at the cost of the level of security that they provide In consequence children at once have more rights with regard to their personal decision making as digital consumers yet fewer democratic rights to participation and protection as digital citizens A theoretically informed yet empirically grounded study of the relationship between core democratic values and the duty to protect young people in the media sphere Children in the Online World will appeal to scholars and students across the social sciences with interests in new technologies risk and the sociology of childhood and youth Book The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
