Pain management is a popular topic for nursing students and one that is covered primarily during years 2 and 3 of UK pre-registration nursing courses. An understanding of the mechanics of pain, how pain affects individuals and how pain can be treated is absolutely core to nursing study and practice, and nurses need to be able to identify, assess and treat pain responsibly and as part of their broader care for patients. The emphasis of the book will not be on facts, physiology or pharmacology, but instead the book will draw on these things to help students develop a solid philosophy of care that encompasses good pain management. *The Research Journey* Sharon F. Rallis, Gretchen B. Rossman, 2012-03-29. This book is a product of our several decades of teaching about research, conducting research ourselves, advising graduate students who conducted research, and of our reflections on the teaching

and on the conduct of research The book is structured to follow a teaching sequence in fact it maps neatly onto our syllabus for the course Each chapter begins with a series of critical questions that we hope will guide reading and prompt further questions for discussion These questions are followed by a dialogue among five graduate students whose journeys into inquiry are just beginning Their challenges and joys are embedded in these dialogues as well as throughout the chapters We also draw on other examples from our students over the years in several places The chapters end with learning activities that we have used over the years and refined based on student feedback and our own critical reflections on how well they worked
