Medicine Meets Virtual Reality 13 James D. Westwood,2005 Magical describes conditions that are outside our understanding of cause and effect Even in modern societies magic based explanations are powerful because given the complexity of the universe there are so many opportunities to use them The history of medicine is defined by progress in understanding the human body from magical explanations to measurable results To continue medical progress physicians and scientists must openly question traditional models For thirteen years MMVR has been an incubator for technologies that create new medical understanding via the simulation visualization and extension of reality Researchers create imaginary patients because they offer a more reliable and controllable experience to the novice surgeon With imaging tools reality is purposefully distorted to reveal to the clinician what the eye alone cannot see Robotics and intelligence networks allow the healer s sight hearing touch and judgment to be extended across distance as if by magic The moments when scientific truth is suddenly revealed after lengthy observation experimentation and measurement is the real magic These moments are not miraculous however book Metro Ethernet Services for LTE Backhaul Roman Krzanowski,2013 The backhaul portion of the network is comprised of intermediate links between the core network and the small sub networks at the edge of the entire hierarchical network This is a critical area because it is the side of the network that communicates with the global Internet This practical resource serves as a comprehensive guide to designing mobile Ethernet backhauling MEBH services in metro areas using carrier Ethernet CE architecture For the first time in any book you find detailed advice on how to put together the many elements of the CE toolbox to create a coherent working design for a specific MEBH service Like solving a difficult jigsaw puzzle you learn how all the CE components and standards interact and gain knowledge of their interdependencies You also gain insight into the tradeoffs and consequences associated with selection of specific components for a particular project BMAS … ,2002 InfoWorld ,1990-10-22 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects
