The Answer to the Problem of Consciousness Jack Tanner, 2021-07-27 There is no problem more baffling to the academic world than the problem of consciousness It s fair to say that no academic has any clue at all about what consciousness is In fact academics have totally confused it with something radically different namely sentience The problem that faces the academic world is the insurmountable one of how you get lifeless mindless purposeless objects material atoms to manifest subjectivity It s a category error to imagine that matter can provide any answers to the foundational issues of mind Academics believe that to answer the problem of subjectivity is thereby to solve the hard problem of consciousness In fact the problem of subjectivity sentience is totally different from the problem of consciousness To understand why simply ponder all of the following statements 1 animals are sentient but not conscious 2 human babies are sentient but not conscious 3 humans who never encountered another human are sentient but not conscious 4 sleepwalking humans are sentient but not conscious The problem of sentience is drastically different from the problem of consciousness and if you conflate the two you have immediately set yourself an impossible task especially if you make any attempt to solve these problems within the framework of materialism i e the ideology of anti mind To understand what consciousness actually is it s essential to understand the difference in the world of sleep between dreaming and lucid dreaming Exactly the same dichotomy is present in the waking world A sleepwalker is a person who can do complex tasks such as riding a motorbike for half an hour without any consciousness A conscious version of a sleepwalker engages in what we refer to as lucid waking Lucid waking is the key to consciousness The fact is that consciousness is not an inherent property of human individuals It s not built into them It s acquired just as some people acquire the ability to become lucid dreamers Since sleepwalkers could do many of the same things as conscious individuals the question is invited of why consciousness is required at all If you don t know what consciousness is how can you expand your consciousness to the maximum Wouldn t you like to be maximally conscious Think

Sleeping to Dream and Dreaming to Wake Up! Vijay Srinath Kanchi, 2022-11-08 Dreams play a significant role in our life meaningfully affecting us in the development of our personality and our spiritual journey They are an everyday experience for any human being Dreams have always been of great interest to poets and philosophers alike since ancient times and examples are aplenty in Indian and Western scriptures However it is an uphill task for an ordinary person to fully appreciate the intricacies and significance of dreams in the day to day life It is here that this book proves as an invaluable guide providing deep understanding on the nature of dream and sleep This book is a repertoire of human wisdom gathered for centuries and attested by the modern science offering enormous insights into our dream and deep sleep states It asks from a common man s point of view many a question that perturb us and provides answers to them from the scientific and spiritual perspectives in a captivating way Some such questions include Do we see dreams in black

and white or in colour What does a visually challenged person see in his dreams Why are some of our dreams extraordinarily vivid with electric colours the clarity and brilliance of which we may never encounter in our ordinary waking lives Why are we non reflective irrational in our dreams Are the dream time and waking time equal How does our memory work in dream state Why do we forget our dreams and is it possible to improve dream recall and cultivate awareness in dreams Why do we fail to distinguish a dream object from the physical world object while we are dreaming If the dream experience exactly feels like the real world and we fail to distinguish it from the waking world while we are dreaming how can we be certain that we are not dreaming now How does a dream contain various persons exhibiting opposite emotions at the same time when all the dream characters including the witnessing dreamer are produced out of single mind of the dreaming person Can we intentionally transform the dream scenarios If so what would be the philosophical implications of it Can dreams and sleeps be utilized for spiritual elevation and many more questions we always wondered about the daily eight hours of our bed time but never got the right answers to We find new meanings and ways in dealing with our dreams in this volume therefore it is a must read for every dream enthusiast as well as any serious spiritual seeker Yoga Journal ,2006-01 For more than 30 years Yoga Journal has been helping readers achieve the balance and well being they seek in their everyday lives With every issue Yoga Journal strives to inform and empower readers to make lifestyle choices that are healthy for their bodies and minds We are dedicated to providing in depth thoughtful editorial on topics such as yoga food nutrition fitness wellness travel and fashion and beauty **Becoming Lucid, Self-Awareness in Sleeping & Waking Life** Lincoln

Stoller,2019-07-02 Lucidity in dreaming starts with lucidity in waking life Lucidity is consciousness itself It exists in a realm of experience beyond words achieving it is not an intellectual exercise To become lucid is a transformation of emotions memories and thought patterns to reach an altered state It s not your image of the walls that you want to dissolve when becoming lucid it s your image of reality This is the first book to approach lucid dreaming through hypnosis Each chapter has an introduction that you read and a trance induction you can listen to online by accessing free MP3 audio files These hypnotic inductions offer you experiential tours of altered states Listen to them while falling asleep and they will become your lucid dream environment Other books view lucid dreaming as awakening in a dream This book views all states as dream states from which lucidity is possible And what one becomes lucid of when one becomes lucid is another dream state as all states are our own constructions Lucidity is an awakening to a level of consciousness that s higher broader deeper and more connected Lucidity is not a goal it s a process it s not something you get it s something you become Doing silly stuff in your dreams is as enlightening as doing silly stuff while awake It s fun for a while but you grow out of it On the other hand breaking open your mind to move into what s now not even comprehensible is something you don t grow out of This is not sleep work or dream work it s life work Exploring the impossible is just the start Let s explore the inconceivable Drawn from the author s experience as a theoretical physicist neurophysiologist and hypnotherapist who focuses on sleep and trance

states Becoming Lucid would like to take your hand and lead you into states of mind you can't even imagine Lincoln Stoller takes the de facto approach to lucid dreaming and turns it on its head Rather than yet another guide book this work represents a paradigm shift to an entirely new mode of thinking Chris Hammond Chief Lucidity Officer at www.worldoflucid.com

Waking, Dreaming, Being Evan Thompson, 2014-11-18 A renowned philosopher of the mind also known for his groundbreaking work on Buddhism and cognitive science Evan Thompson combines the latest neuroscience research on sleep dreaming and meditation with Indian and Western philosophy of mind casting new light on the self and its relation to the brain Thompson shows how the self is a changing process not a static thing When we are awake we identify with our body but if we let our mind wander or daydream we project a mentally imagined self into the remembered past or anticipated future As we fall asleep the impression of being a bounded self distinct from the world dissolves but the self reappears in the dream state If we have a lucid dream we no longer identify only with the self within the dream Our sense of self now includes our dreaming self the I as dreamer Finally as we meditate either in the waking state or in a lucid dream we can observe whatever images or thoughts arise and how we tend to identify with them as me We can also experience sheer awareness itself distinct from the changing contents that make up our image of the self Contemplative traditions say that we can learn to let go of the self so that when we die we can witness its dissolution with equanimity Thompson weaves together neuroscience philosophy and personal narrative to depict these transformations adding uncommon depth to life's profound questions Contemplative experience comes to illuminate scientific findings and scientific evidence enriches the vast knowledge acquired by contemplatives

Dream Life, Wake Life Gordon G. Globus, 1987-01-09 Attempts to understand the human condition through dreaming reach back to antiquity especially in such classical Indian philosophical texts as the Rg Veda and the Upanisads In a more contemporary vein *Dream Life Wake Life* continues this investigation as it views the dream as an open window on the waking human condition The book discusses the major twentieth century contributions to dream theory beginning with Freud's 1900 psychoanalytical theory of dreaming and continuing through Jung's transpersonal and Boss's existential approaches Recent phenomenological cognitive and biological developments are also considered *Dream Life Wake Life* addresses human creativity as illuminated by dreaming While Freud held a transformative view of dreaming in which dream life is secondhand formed by combining memory traces of diverse past waking experiences into novel compositions Gordon G Globus sees the process as creative the fundamental creative action inherent in the human condition

The Quintessence of Dust: If Humans Aren't Dust, What Are They? David Sinclair, 2023-02-21 Are you self organizing dust that becomes alive if it is arranged in just the right way Are you dust that had life breathed into it by God as the Book of Genesis says Are you dust that links to a mind and is animated by the mind so long as the link remains functional Well what are you Do you know If you don't know shouldn't you be trying to know Go on what is your quintessence Write it down If you can't what does that say about you Here's an astounding thing Feeling types sensing types intuitive types and thinking types all have totally different ideas about the dust from which the Bible said we came Do you understand why Come inside and find out why you hold the beliefs you do Your beliefs would be totally different if you had a different personality type Doesn't that disturb you If you were born in a different part of the world to different parents you would have completely different religious beliefs Equally if you were born with a different personality type you would relate entirely differently to the world and believe totally different things about the nature of reality Don't you want to rise above all these contingencies and know what the absolute objective truth is Why not
