

HYDRAULIC SYSTEM COMPATIBILITY

There are six general questions that must be answered before adapting attachments that require hydraulic oil power.

1. What is the hydraulic pressure requirement, minimum and maximum? Are they higher than the maximum pressure of the model?

| Model | Maximum Pressure |
|--------------------|-----------------------------------|
| L865, Lx865, Lx885 | 2500 to 2600 PSI (170-176 bar) |
| Lx985 | 2500 to 2600 PSI (170-176 bar) |

2. What is the hydraulic oil flow requirement? Is it more than the highest total flow rate of the skid-steer loader model?

| Model | Standard Hydraulics | High Flow Hydraulics |
|------------------------|--|---|
| L865 Lx865 Lx885 | 17.6 GPM (66.6 l/min.) @2225 RPM @1000 PSI (68 bar) | 31.0 GPM (117 l/min.) @2250 RPM @1000 PSI (68 bar) |
| Lx985 | 20.0 GPM (75.7 l/min.) @2325 RPM @2000 PSI (138 bar) | 34.0 GPM (129 l/min.) @2325 RPM @2000 PSI (138 bar) |

NOTE: When using the High-Flow system, 3/4" quick couplers must be used or high system backpressure may result.

3. Will the attachment accept oil flow in both directions?

If "YES", nothing is required.

If "NO", install a check valve or cross into the attachment return line to prevent reverse oil flow to the attachment.

Examples: Backhoes and trees spades with a separate control valve do not accept oil flow in both directions.

4. Must the attachment "Free Wheel" to a stop?

If "YES", a crossover relief connection must be installed on the attachment side to allow the attachment to free wheel to a stop after the skid-steer loader hydraulics is turned off.

Figure 1-32

If "NO", nothing is required.

Example: Snow blowers.

5. Will the attachment accept hydraulic system backpressure?

If "YES", nothing is required.

If "NO", the attachment will not function properly on a New Holland skid-steer loader. Normal backpressure for New Holland skid-steer loaders is between 200 to 250 PSI.

Examples: Post drivers; some breakers; and some hand held hydraulic tools do not accept system backpressure.

If all the skid-steer loader oil flow is not required to operate an attachment (e.g., Shaver Post Driver), a flow divider can be installed into the hydraulic oil circuit on the attachment. The flow divider sends the required oil flow to the attachment and the remainder back to the normal skid-steer loader hydraulic circuits.
