Lynch Pacific Languages An Intro:

Pacific Languages John Lynch, 2016-06-01 Almost one quarter of the world's languages are or were spoken in the Pacific making it linguistically the most complex region in the world. Although numerous technical books on groups of Pacific or Australian languages have been published and descriptions of individual languages are available until now there has been no single book that attempts a wide regional coverage for a general audience. *Pacific Languages* introduces readers to the grammatical features of Oceanic, Papuan and Australian languages as well as to the semantic structures of these languages. For readers without a formal linguistic background a brief introduction to descriptive linguistics is provided. In addition to describing the structure of Pacific languages this volume places them in their historical and geographical context, discusses the linguistic evidence for the settlement of the Pacific and speculates on the reason for the region's many languages. It devotes considerable attention to the effects of contact between speakers of different languages and to the development of pidgin and creole languages in the Pacific. Throughout technical language is kept to a minimum without oversimplifying the concepts or the issues involved. A glossary of technical terms, maps and diagrams help identify a language geographically or genetically, reading lists and a language index guide the researcher interested in a particular language or group to other sources of information. Here at last is a clear and straightforward overview of Pacific languages for linguists and anyone interested in the history of sociology of the Pacific.

Levinson, Asifa Majid, 2011-08-18 Reciprocals are an increasingly hot topic in linguistic research This reflects the intersection of several factors the semantic and syntactic complexity of reciprocal constructions their centrality to some key points of linguistic theorizing such as Binding Conditions on anaphors within Government and Binding Theory and the centrality of reciprocity to theories of social structure human evolution and social cognition No existing work however tackles the question of exactly what reciprocal constructions mean cross linguistically Is there a single Platonic reciprocal meaning found in all languages or is there a cluster of related concepts which are nonetheless impossible to characterize in any single way That is the central goal of this volume and it develops and explains new techniques for tackling this question At the same time it confronts a more general problem facing semantic typology how to investigate a category cross linguistically without pre loading the definition of the phenomenon on the basis of what is found in more familiar languages *Children's Multilingual Literacy* Pauline Harris, Cynthia Brock, Elspeth McInnes, Bec Neill, Alexandra Diamond, Jenni Carter, Ufemia Camaitoga, Meresiana Krishna, Eleni Giannakis, 2020-10-22 This book offers a comprehensive report on a three year cross cultural critical participatory action research study conducted in children s homes and communities in Fiji This project contributed to building sustainable local capacity in communities without access to early childhood services so as to promote preschool children s literacy development in their home languages and English The book includes rich descriptions of the young children s lived multilingual literacy practices in their home and community contexts This work advances research based practices for fostering young children s multilingual literacy and building community capacity in a post colonial Pasifika context further it shares valuable insights into processes and complexities that are inherent to multiliteracy and cross cultural research Rethinking Universals Jan Wohlgemuth, Michael Cysouw, 2010-03-26 Universals of language have been studied extensively for the last four decades allowing fundamental insight into the principles and general properties of human language Only incidentally have researchers looked at the other end of the scale And even when they did they mostly just noted peculiar facts as quirks or unusual behavior without making too much of an effort at explaining them beyond calling them exceptions to various rules or generalizations Rarissima and rara features and properties found only in one or very few languages tell us as much about the capacities and limits of human language s as do universals Explaining the existence of such rare phenomena on the one hand and the fact of their rareness or uniqueness on the other is a reasonable and interesting challenge to any theory of how human language works The present volume for the

first time compiles selected papers on the study of rare linguistic features from various fields of linguistics and from a wide range of languages

Field Linguistics Terry Crowley, 2007 This book is a comprehensive practical guide to field linguistics. Robert Louis Stevenson's Pacific Impressions Carla Manfredi, 2018-11-11 This book tackles photography's role during Robert Louis Stevenson's travels throughout the Pacific Island region and is the first study of his family's previously unpublished photographs. Cutting across disciplinary boundaries, the book integrates photographs with letters, non-fiction and poetry and includes much unpublished material. The original readings of photographs and non-fiction highlight Stevenson's engagement with colonial ideology and reality and advance new arguments about Victorian travel, settlement and colonialisms in the Pacific. Like the Stevensons, the book moves from the Marquesas to the atolls of the Gilbert Islands in Micronesia, from the Kingdom of Hawaii's political ambitions to Samoan plantations and the Stevensons' settlement at Vailima. Central to this study is the notion that Pacific history and Pacific Island cultures matter to the interpretation of Stevenson's work and a rigorous historical and cultural contextualization ensures that local details structure literary and photographic interpretation. The book's historical grounding is key to its insightful conclusions regarding travel, settlement, photography and colonialism.
