Of The US Tank From 1945-1991 Major Anthony I. Bailey,2014-08-15 The American primary tank in the Second World War
was inferior to its German counterpart for all but the final months of the war The U S tank evolved and demonstrated its
superiority to the world in Operation DESERT STORM in 1991 This monograph examines the evolution of America s primary
tank in the years between 1945 and 1991 focusing on three periods the Second World War the Korean War and the 1973
Arab Israeli War Each period examines the adversary America s industrial capabilities and the combat environment
Describing the adversary highlights there is a tangible threat to U S armored forces In the face of this threat the United
States remained capable of building new more complicated and more expensive tanks which demonstrates the industrial
endowment required to meet the demands of the threat An examination of the combat environment reveals why the U S Army
and its armor force seemed so fixated on Europe as the next war s first battlefield Ultimately this paper serves to
demonstrate that a tank series such as the M1 Abrams family is a required component in the U S Army s combined arms
arsenal As such it is important that the aging Abrams having served the Army in Operation Desert Storm and the Global War
on Terror continue to evolve in preparation for the next war **Sampling the Threat Domain for Efficient Tank
