M240 Machine Gun Paul Ruffin:

The Time the Waters Rose Paul Ruffin, 2016-02-28 A collection of short stories about the rough and sometimes mysterious waters. Writer Paul Ruffin celebrates the mysteries of the sea in the short story collection *The Time the Waters Rose*. From shrimp boat captains to shipyard workers, Ruffin's characters are men who drink, swear, fight, and sometimes kill, but what unifies them is that all embracing magic of the Gulf coast and the barrier islands. While some are drawn to the Gulf for its mystery, others are there simply to earn a living, and all are unforgettable, from the bawdy snuff-dipping rednecks to the landlocked shipbuilder who erects a ship in his suburban backyard to the salty old freethinker aboard *The Drag Queen* who gives his evangelical shipmate hell for suggesting they say grace before lunch. The title story, which Ruffin started writing as a ten-year-old bored with traditional Biblical tales, is an irreverent satirical retelling of the epic Noah story. All the other tales are set in and around the Mississippi coast, but they are not your typical sea and fishing yarns. While some of the stories may seem far-fetched, they are all drawn from Ruffin's experiences and are rich with tactile descriptions of the Pascagoula River and its surrounding marshlands, from the sun and shadow play of the open waters to the powerful thunderheads and squalls that arise at a moment's notice over the islands of the Gulf.

The M240 Machine Gun Paul Ruffin, Bob Conroy, 2015 The M240 Machine Gun traces the development of the weapon, currently the primary medium weight machine gun of our military, through the latest configuration, the M240 SLR, designed and manufactured by Ohio Ordnance. When the United States military determined during the late 1970s that it was time to find a replacement for older machine guns in the services, they initiated an extensive search for a weapon that would fire the 7.62 NATO round and prove economical, adaptable in many configurations, relatively lightweight, accurate, and more reliable than its predecessors. The clear winner was the Belgium-made Fabrique Nationale MAG, later adapted and renamed the M240, a belt-fed 7.62 air-cooled weapon easily adapted for use on ground vehicles, aircraft, and seagoing craft, and light enough to be carried and operated by a single soldier. Today the M240 is the primary medium machine gun of our armed forces and of many of our allies across the globe. Relatively few fully transferable MAGs are in civilian hands, and the cost of a transferable MAG of any sort is upward of 70,000. Ohio Ordnance Works OOW is offering a semi-automatic only version of the M240 as its M240 SLR for self-loading rifle. The M240 SLR is a mix of original M240 components and parts designed and manufactured by OOW. The right sideplate, which is the receiver, according to the BATFE, is thicker than the military M240, and the interior parts have been reduced accordingly to ensure that fully automatic components cannot be inserted. Further, the SLR cannot accept a military trigger group or operating rod.
