Rebooting Pedagogy and Education systems for the Twenty-first Century: Why we need course-corrections immediately Sujay Rao Mandavilli, 2024-04-09

Education is the fundamental pillar upon which any human civilization rests As a matter of fact no civilization in any meaningful form or degree has been possible in human history that has not been built on the bulwark and edifice of education While literacy may have been limited to the privileged few in early ancient civilizations it was these privileged few who controlled the masses and set the tempo for meaningful progress in such civilizations educational systems have proven to be the bedrock and foundational pillar upon which much of human accomplishment and achievement have rested too In spite of the naysayers the cynics and the pessimists education has expanded greatly in the twentieth century while the worlds earliest civilizations were not western in the canonical sense of the term there is no denying that western civilizations have pulled away strongly since then Riding on the shoulders on ancient Greece western intellectualism has been the bulwark upon which the superstructure of modern civilization has been built Even as recently as the middle of the twentieth century the rest of the world as opposed to the west had a lot of catching up to do Thankfully and mercifully a lot has changed since then India in the 1950 s and 1960 s emphasized higher education but neglected universal primary education as evidenced by low primary school enrollments and a high rate of dropouts Since then programs and schemes such as the Sarva Siksha Abhiyan or education for all programs have increased primary school enrollment considerably India now comfortably stands on the threshold of universal adult literacy While the quantity of education has been augmented quality has often failed to keep pace The tenets and the essential doctrines forming a part and parcel of the foundational pillars of pedagogy and education are antiquated and are still steeped in the western experience What is worse is that is very little awareness on the issue of the need for change this must be the foundation of all meaningful change but alas that foundation has yet to be built

In this book we draw upon our long list of papers on the social science particularly anthropological pedagogy and the sociology of science and propose the direction we believe pedagogy must take in the twenty first century This can be no one man army we invite other scholars to contribute in eminent measure We also believe that this i e a foundational assessment of the concepts of pedagogy must become one of the more important and vital movements of the twenty first century This work is also at the heart of our globalization of science movement as many if not most concepts in various fields of the social science are based on old and archaic western centric paradigms There is also an unnatural gap between various fields of social sciences and the non social sciences too just as careerism is rampant across disciplines and what we called institutional coherentism is lacking Scientists say however recent research has shown that Does that mean that old research was wrong Why was it wrong Was it due to the absence of data or was it methodological error Why do we go round and round without a meaningful long term direction Very little scholarship is driven by the absolute desire to do good to society As Thomas Paine once famously stated A body of men holding themselves accountable to nobody ought not to be trusted by anybody We have theories theories and only theories all driven by old fashioned careerism or academic rivalry and with limited explanatory power All this needs to change in the twenty first century and practical application of knowledge emphasized To quote C S Lewis Experience that most brutal of teachers But you learn my God do you learn Anand Mahindra and several other individuals have repeatedly called for a new world class education system in India and elsewhere but there is very little conceptual clarity on how we should go about creating one Let a million scholars bloom Let a million intellectuals bloom Let a million scientists social scientists included bloom in different parts of the world all in the twenty first century Why should we hold our tongue and suffer in silence Let intellectuals drive meaningful and productive change Let better education systems form the backbone of better societies Let there be a healthy rivalry among nations to develop better and better education systems There is no need for only western nations to take the lead here Those who have better ideas can indeed leapfrog everyone else Those who think better and do better win *Perspectives and Practices of Education for Sustainable Development* Rehema M. White, Simon Kemp, Elizabeth A. C. Price, James W. S.

Longhurst, 2025-04-23 Informed by theory and full of practical advice this key title offers a clear route to education for sustainable development ESD whilst questioning how we reconcile participatory inclusive processes and the urgency of global crises This handbook provides guidance for those with an interest in the purpose and direction of learning and the principles and practices of sustainability in universities in the UK and beyond With critical analysis and useful case studies and recommendations the book covers key topics such as The need for sustainable development and the role that universities can play in this Showing how ESD should be part of a whole institution approach Development of relevant curricula with innovative and inspiring pedagogies to support sustainability competencies Transdisciplinary learning and pioneering forms of knowledge production Graduate futures and emerging priorities in the field of ESD Through detailed case studies from

experts in the field this book demonstrates how ESD enables a critical interrogation of our world and strengthens the capacities of our universities to nurture future thinking leaders This is essential reading for all those interested in beginning or widening ESD in programmes universities and the wider sector including academic staff university senior managers and support staff students policy makers employers and community leaders **Teaching Tech Together** Greg

Wilson,2019-10-08 Hundreds of grassroots groups have sprung up around the world to teach programming web design robotics and other skills outside traditional classrooms These groups exist so that people don t have to learn these things on their own but ironically their founders and instructors are often teaching themselves how to teach There s a better way This book presents evidence based practices that will help you create and deliver lessons that work and build a teaching community around them Topics include the differences between different kinds of learners diagnosing and correcting misunderstandings teaching as a performance art what motivates and demotivates adult learners how to be a good ally fostering a healthy community getting the word out and building alliances with like minded groups The book includes over a hundred exercises that can be done individually or in groups over 350 references and a glossary to help you navigate educational jargon *A New Approach to I.C.S.E.
