Dale Kinkade, 2011-06-24 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing Ten Traditional Tellers Margaret Read MacDonald, 2006 In this unique collection of stories and personal interviews folklorist Margaret Read MacDonald examines storytelling through the distinct voices of the tellers themselves Ten Traditional Tellers offers an intimate look at their lives and art as they discuss their reasons for telling their uses of the stories and the influence of their cultural heritage Coming from places such as Ghana Brazil and Thailand the tellers include colorful characters like Vi Hilbert a member of the Upper Skagit tribe who continues to work despite near blindness and Rinjing Dorje whose bawdy shepherd's tales shock his audiences and validate his identity in a western culture that expects piousness from Tibetans In addition to the interviews the book also includes brief introductions for each teller and one or two of their representative stories *Recent Trends in Meaning-Text Theory* Leo Wanner, 1997-12-31 The present volume contains articles of well known representatives of the Meaning Text Theory MTT and other related linguistic theories Founded by I Mel'cuk and A Zholkovsky in the sixties in Moscow MTT soon became known in the West as a prominent outsider theory The picture changed since then though MTT gained importance in several areas of linguistics and computational linguistics It influenced the design of new grammar

formalisms such as Dependency Tree Grammars Also specific parts of MTT have been directly overtaken into other theories consider for example the work on integrating Lexical Functions into Pustejovsky's Generative Lexicon The present volume is a further convincing demonstration of MTT's liveliness and relevance to the field's burning issues The focus of the volume is on semantics semantic representation and relation of semantics to surface in MTT Six out of eight articles Polguère Escalier Paducheva St Germain Beck Bogulavsky deal with problems related to these topics while the last two articles of the volume Sgall and Rambow Joshi throw a bridge between MTT or more precisely between dependency based theories of which MTT is one instantiation and other linguistic theories

The Salish Language Family Paul D. Kroeber,1999-01-01 In this pioneering study Paul D Kroeber examines the history of an array of important syntactic constructions in the Salish language family This group of some twenty three languages centrally located in the Northwest Coast and Plateau Regions is noted for its intriguing differences from European languages including the possible irrelevance of a noun verb distinction to grammatical structure and the existence of distinctive systems of articles which also often function as marks of subordination Kroeber draws on and analyzes data from a wide range of textual and other sources Centering his detailed investigation on patterns of subordination and focusing he situates these against the broader background of Salish syntax examines their interrelationships and reconstructs their historical development The

result is a study that significantly enhances understanding of the structure and history of Salish As important Kroeber s critical command of sources and well considered historical proposals are exemplary setting a methodological standard for Americanist scholarship *Typological Hierarchies in Synchrony and Diachrony* Sonia Cristofaro,Fernando

Zúñiga,2018-07-15 Typological hierarchies are widely perceived as one of the most important results of research on language universals and linguistic diversity Explanations for typological hierarchies however are usually based on the synchronic properties of the patterns described by individual hierarchies not the actual diachronic processes that give rise to these patterns cross linguistically This book aims to explore in what ways the investigation of such processes can further our understanding of typological hierarchies To this end diachronic evidence about the origins of several phenomena described by typological hierarchies is discussed for several languages by a number of leading scholars in typology historical linguistics and language documentation This evidence suggests a rethinking of possible explanations for typological hierarchies as well as the very notion of typological universals in general For this reason the book will be of interest not only to the broad typological community but also historical linguists cognitive linguists and psycholinguists **Existential Faithfulness**

Caro Struijke,2014-04-23 First Published in 2003 Initially a doctoral dissertation submitted to the University of Maryland at College Park in August 2000 this book is a revised version with an expanded discussion on dissimilation as well as looking at existential faithfulness relations in reduplicative TETU and feature movement **The Cambridge Handbook of**

Linguistics IV / Lingüística misionera IV Otto Zwartjes,Ramón Arzápalo Marín,Thomas C. Smith-Stark,2009-05-05 This fourth volume on Missionary Linguistics focuses on lexicography It contains a selection of papers derived from the Fifth International Conference on Missionary Linguistics held in Mérida Yucatán Mexico 14th 17th March 2007 As with the previous three volumes 2004 on general issues 2005 on orthography and phonology and 2007 on morphology and syntax this volume looks at the lexicographical production of missionaries in general the influence of European sources such as Ambrogio Calepino and Antonio de Nebrija translation theories attitudes toward non Western cultures trans and interculturality semantics morphological analysis and organizational principles of the dictionaries such as styles and

structure of the entries citation forms etc It presents research into languages such as Maya Nahuatl Tarasco Pur pecha Lushootseed Equatorian Quechua Tupinamb Ilocan Tamil and Southern Min Chinese dialects *Resources in Education*, 1998 *Native Seattle* Coll Thrush, 2009-11-23 Winner of the 2008 Washington State Book Award for History Biography In traditional scholarship Native Americans have been conspicuously absent from urban history Indians appear at the time of contact are involved in fighting or treaties and then seem to vanish usually onto reservations In *Native Seattle* Coll Thrush explodes the commonly accepted notion that Indians and cities and thus Indian and urban histories are mutually exclusive that Indians and cities cannot coexist and that one must necessarily be eclipsed by the other Native people and places played a vital part in the founding of Seattle and in what the city is today just as urban changes transformed what it meant to be Native On the urban indigenous frontier of the 1850s 1860s and 1870s Indians were central to town life Native Americans literally made Seattle possible through their labor and their participation even as they were made scapegoats for urban disorder As late as 1880 Seattle was still very much a Native place Between the 1880s and the 1930s however Seattle s urban and Indian histories were transformed as the town turned into a metropolis Massive changes in the urban environment dramatically affected indigenous people s abilities to survive in traditional places The movement of Native people and their material culture to Seattle from all across the region inspired new identities both for the migrants and for the city itself As boosters historians and pioneers tried to explain Seattle s historical trajectory they told stories about Indians as hostile enemies as exotic Others and as noble symbols of a vanished wilderness But by the beginning of World War II a new multiracial urban Native community had begun to take shape in Seattle even as it was overshadowed by the city s appropriation of Indian images to understand and sell itself After World War II more changes in the city combined with the agency of Native people led to a new visibility and authority for Indians in Seattle The descendants of Seattle s indigenous peoples capitalized on broader historical revisionism to claim new authority over urban places and narratives At the beginning of the twenty first century Native people have returned to the center of civic life not as contrived symbols of a whitewashed past but on their own terms In Seattle the strands of urban and Indian history have always been intertwined Including an atlas of indigenous Seattle created with linguist Nile Thompson *Native Seattle* is a new kind of urban Indian history a book with implications that reach far beyond the region Replaced by ISBN 9780295741345 **Humanities**, 1995

The Typology of Parts of Speech Systems David Beck, 2013-01-11 This book presents rigorous and criterial definitions of the major parts of speech noun verb and adjective that account both for their syntactic behaviour and for their observed typological variation Based on an examination of languages from five different groups Salishan Cora Quechua Totonac and Hausa this book argues that parts of speech must be defined by combining the criteria of syntactic markedness which characterizes lexical classes in terms of unmarked syntactic roles and semantic prototypicality which delimits their prototypical meanings Adjectives are shown to be the marked and hence most variable class because of their inherent non

iconicity at the semantics syntax interface The four member typology of parts of speech systems languages with three open classes those that group adjectives with verbs those that group adjectives with nouns and those that conflate all three current in the literature is easily generated by free recombination of these two criterial features Closer examination of the data however casts doubt on the existence of one of the four possible language types the noun adjective conflating inventory which is accounted here for by replacing free recombination of semantic and syntactic features with an algorithm for the subdivision of the lexicon that gives primacy to semantics over syntax
