

A First Course In Atmospheric Radiation

Second Edition

Grant W. Petty

Grant Petty Atmospheric Radiation Solutions

IM Harris

Grant Petty Atmospheric Radiation Solutions:

A First Course in Atmospheric Radiation Grant W. Petty, 2006-01-01 This textbook covers the essentials of atmospheric radiation at a level appropriate to advanced undergraduates and first year graduate students. It was written specifically to be readable and technically accessible to students having no prior background in the subject area and who may or may not intend to continue with more advanced study of radiation or remote sensing. The author emphasizes physical insight first and foremost but backed by the essential mathematical relationships. The second edition adds new exercises, improved figures, a table of symbols and discussions of new topics such as the Poynting vector and the energy balance within the atmosphere. The book web page includes additional resources for courses taught using this book including downloadable printable PDF figures as well as solutions to most problems for instructors of recognized courses only.

A First Course in Atmospheric Thermodynamics Grant W. Petty, 2008-01-01 This textbook is written for meteorology majors who require an initial introduction to the physical properties of the atmosphere and to the essential principles and real world applications of atmospheric thermodynamics. These topics are supplemented by a sampling of techniques and technologies related to atmospheric measurements and observations. A unique tutorial included as an appendix teaches students how to attack physical problems symbolically, deferring numerical calculations until the final step in the solution. The author's objectives include not only covering the traditional core subject matter of an undergraduate thermodynamics course but also facilitating students' transition from a purely abstract understanding of calculus and physics concepts to the confident application of both to the science of meteorology.
