Green Building Management and Smart Automation Solanki, Arun, Nayyar, Anand, 2019-07-05 Throughout the world there is an increasing demand on diminishing natural resources in the industrial transport commercial and residential sectors. Of these the residential sector uses the most energy on such needs as lighting water heating air conditioning space heating and refrigeration. This sector alone consumes one third of the total primary energy resources available. By using green building and smart automation techniques this demand for energy resources can be lowered. Green Building Management and Smart Automation is an essential scholarly publication that provides an in depth analysis of design technologies for green building and highlights the smart automation technologies that help in energy conservation along with various performance metrics that are necessary to facilitate a
