**Power Shift** Peter Newell, 2021-04-15 Energy transitions are fundamental to achieving a zero carbon economy. This book explains the urgently needed transition in energy systems from the perspective of the global political economy. It develops an historical global political and ecological account of key features of energy transitions from their production and financing to how they are governed and mobilised. Informed by direct engagement in projects of energy transition, the book provides an accessible account of the real world dilemmas in accelerating transitions to a low carbon economy. As well as changes to technology, markets, institutions and behaviours, *Power Shift* shows that shifts in power relations between and within countries and across social groups and political actors are required if the world is to move onto a more sustainable path. Using contemporary and historical case studies to explore energy transitions, it will be of interest to students and researchers across disciplines, policymakers and activists.

**Low Carbon Transition in Emerging Economies** Erkin Erdoğan, 2023-09-15 Many emerging economies are on the front line of the devastating impacts of global warming such as desertification and extreme weather events, but for historical and political reasons they follow ambitious growth targets with seemingly little concern for climate change and environmental degradation. Focusing on the case of Turkey, this book investigates the economic impacts of possible climate change policies to help meet the required mitigation targets and transition to a low carbon economy. In order to reach net zero targets by 2050 in compliance with the Paris Agreement, Turkey must introduce policies that promote low carbon investments, green jobs and low carbon employment more broadly. This book explores the empirical evidence on the effectiveness of a carbon pricing mechanism by developing an econometric vector autoregression (VAR) model to analyse key data sets. This time series analysis provides insights on a macro level dealing with aggregate data in which the role and complexity of micro interferences disappear, allowing for the discovery of patterns and changes over time. Thus, the book contributes to the literature on methodology by arguing that time series analysis is one of the best fitting approaches to estimate possible impacts of climate change policies on an economy. Additionally, the results of the model are compared and contrasted with similar data from other emerging economies to identify potential common policy solutions between countries at a similar stage of development. This book is vital reading for researchers interested in climate policy, the economics of climate change and environmental economics.

[Within Reach](#) Stephane Hallegatte, Catrina Godinho, Jun Rentschler, Paolo Avner, Ira Irina Dorband, Camilla Knudsen, Jana Lemke, Penny Mealy, 2024-01-10 This report looks at the political economy of net zero policy from common challenges to the development of strategies to overcome them. It shows how governments can improve political economy conditions over time with progressive climate governance interventions while overcoming more immediate barriers with better policy design and communication.

**Survival of the Greenest** Amir Lebdioui, 2024-05-31 The pathways to economic development are changing. Environmental sustainability is no longer a choice but a necessity to maintain a competitive edge in the global economy. Just like in nature where survival hinges

on adaptation this Element shows how nations adjust to and take advantage of the new dynamics of structural transformation induced by climate change First by analysing the uneven industrial geography of decarbonisation the inadequate state of climate financing and rise of green protectionism it demonstrates that the low carbon economy stands to increase economic disparities between nations unless action is taken Then by examining green industrial policies and their varied success it explains how governments can still join the green industrialisation race Finally it examines how to adapt green industrial policy to different starting points market sizes productive structures state business relations dynamics institutional layouts and ecological contexts This title is also available as Open Access on Cambridge Core      **Decarbonizing Development**

Marianne Fay,Stephane Hallegatte,Adrien Vogt-Schilb,Julie Rozenberg,Ulf Narloch,Tom Kerr,2015-06-09 The science is unequivocal stabilizing climate change implies bringing net carbon emissions to zero This must be done by 2100 if we are to keep climate change anywhere near the 2oC warming that world leaders have set as the maximum acceptable limit Decarbonizing Development Three Steps to a Zero Carbon Future looks at what it would take to decarbonize the world economy by 2100 in a way that is compatible with countries broader development goals Here is what needs to be done Act early with an eye on the end goal To best achieve a given reduction in emissions in 2030 depends on whether this is the final target or a step towards zero net emissions Go beyond prices with a policy package that triggers changes in investment patterns technologies and behaviors Carbon pricing is necessary for an efficient transition toward decarbonization It is an efficient way to raise revenue which can be used to support poverty reduction or reduce other taxes Policymakers need to adopt measures that trigger the required changes in investment patterns behaviors and technologies and if carbon pricing is temporarily impossible use these measures as a substitute Mind the political economy and smooth the transition for those who stand to be most affected Reforms live or die based on the political economy A climate policy package must be attractive to a majority of voters and avoid impacts that appear unfair or are concentrated on a region sector or community Reforms have to smooth the transition for those who stand to be affected by protecting vulnerable people but also sometimes compensating powerful lobbies      **Sustainable Development Policy** Michael von Hauff,Claudia Kuhnke,2017-04-21

Sustainable Development Policy A European Perspective uses a variety of multidisciplinary perspectives to explore the ways in which sustainable infrastructures can play a more prominent and effective role in international development policy Building on a solid introduction to sustainability and development policy this book discusses ways in which viable reform can be promoted through coherent governing the design of social security systems education systems and the possibilities of fair trade as an alternative trading concept Sustainable Development Policy generates a platform on which to encourage constructive dialogue on issues surrounding sustainability in the wake of the global scarcity of natural and economic resources This edited collection will be of great interest to all students and lecturers of development studies and development policy as well as researchers from other disciplines looking for an introduction to sustainable development

policy and its practical applications      **Creating Sustainable Bioeconomies** Ivar Virgin,E. Jane Morris,2016-08-25 The growing global demand for food feed and bio based renewable material is changing the conditions for agricultural production worldwide At the same time revolutionary achievements in the field of biosciences are contributing to a transition whereby bio based alternatives for energy and materials are becoming more competitive Creating Sustainable Bioeconomies explores the prospects for biosciences and how its innovation has the potential to help countries in the North Europe and the South Africa to move towards resource efficient agriculture and sustainable bioeconomies Throughout the book the situations of Europe and Sub Saharan Africa will be compared and contrasted and opportunities for mutual learning and collaboration are explored The chapters have been written by high profile authors and deal with a wide range of issues affecting the development of bioeconomies on both continents This book compares and contrasts the situations of these two regions as they endeavour to develop knowledge based bioeconomies This volume is suitable for those who are interested in ecological economics development economics and environmental economics It also provides action plans assisting policy makers in both areas to support the transition to knowledge based and sustainable bioeconomies      **The Political Economy of Climate Finance Effectiveness in Developing Countries** Mark Purdon,2024 In The Political Economy of Climate Finance Effectiveness in Developing Countries Mark Purdon contributes to broader debates on the international climate cooperation by evaluating how three different climate finance instruments have been undertaken in three countries Tanzania Uganda and Moldova and evaluates their effectiveness in actually reducing emissions He shows that the effectiveness of climate finance tools depends on the interaction between a nation s development policy paradigms and its interests in other sectors of their economies Purdon s findings further inform the design of international and transnational efforts to engage developing countries on climate change mitigation by emphasizing the importance of domestic politics and the state

**Transformational Change in Environmental and Natural Resource Management** Mike Young,Christine Esau,2016-10-04 The aim of this book is to catalyse global interest in the pursuit of transformational changes in natural resource and environmental management It is shown that transformational policy reforms involve fundamental shifts in strategy with far reaching consequences for the structure of industries the way people behave and the resources they use Transformational reforms typically involve a decision to change a suite of institutional arrangements that will result within a short period of time in a paradigm shift and the emergence of an approach that will be recognised as being totally different to the arrangements that were previously in place Transformational change is well established in business and can deliver outstanding results In the world of policy development however many transformational policy reforms flounder Unlike incremental policy reforms they are often seen to be politically risky and prone to failure Using examples of success and failure coupled with insights from practitioners and academics who have succeeded in getting transformational reforms implemented this book presents a set of guidelines for excellence in the pursuit of transformational policy reforms It includes

detailed case studies from Australia China Europe New Zealand South east Asia and the USA
