Agriculture in African South of the Sahara SSA can be transformed if the right public support is provided at the initial stage
and it can sustain itself once the enabling environment is put in place Successes are also specific to the location of projects In
Ghana interesting insights are obtained from the successful Kpong Irrigation Project KIP contrasted with other major
irrigation projects in the country Through an exploratory review we describe how a productive system evolved in KIP and
how public support for critical aspects accumulation of crop husbandry knowledge selection and supply of profitable varieties
and mechanization of land preparation might have created a productive environment that the private sector could enter and
fill in the market for credit processing mechanization of harvesting and other institutional voids that typically have
constrained agricultural transformation in the rest of SSA Slower progress in other projects also raises a number of questions
We conclude by summarizing those questions and some testable hypotheses for future research *Diesel & Gas Turbine
