Gravity By James Hartle Solutions Manual:

300 Problems in Special and General Relativity Mattias Blennow, Tommy Ohlsson, 2021-12-09 Einstein's theories of special relativity and general relativity form a core part of today's undergraduate or Masters level physics curriculum. This is a supplementary problem book or student's manual consisting of 150 problems in each of special and general relativity. The problems, which have been developed, tested, and refined by the authors over the past two decades, are a mixture of short form and multi-part extended problems with hints provided where appropriate. Complete solutions are elaborated for every problem in a different section of the book; some solutions include brief discussions on their physical or historical significance. Designed as a companion text to complement a main relativity textbook, it does not assume access to any specific textbook. This is a helpful resource for advanced students for self-study, a source of problems for university teaching assistants, or as inspiration for instructors and examiners constructing problems for their lectures, homework, or exams.
