Bioregionalism and Global Ethics Richard Evanoff, 2010-09-13 While a number of schools of environmental thought including social ecology ecofeminism ecological Marxism ecoanarchism and bioregionalism have attempted to link social issues to a concern for the environment environmental ethics as an academic discipline has tended to focus more narrowly on ethics related either to changes in personal values or behavior or to the various ways in which nature might be valued What is lacking is a framework in which individual social and environmental concerns can be looked at not in isolation from each other but rather in terms of their interrelationships In this book Evanoff aims to develop just such a philosophical framework one in which ethical questions related to interactions between self society and nature can be discussed across disciplines and from a variety of different perspectives The central problem his study investigates is the extent to which a dichotomized view of the relationship between nature and culture perpetuated in ongoing debates over anthropocentric vs ecocentric approaches to environmental ethics might be overcome through the adoption of a transactional perspective which offers a more dynamic and coevolutionary understanding of how humans interact with their natural environments Unlike anthropocentric approaches to environmental ethics which often privilege human concerns over ecological preservation and some ecocentric approaches which place more emphasis on preserving natural environments than on meeting human needs a transactional approach attempts to create more symbiotic and less conflictual modes of interaction between human cultures

and natural environments which allow for the flourishing of both

A New Understanding of Terrorism M.R. Haberfeld, Agostino Hassell, 2009-07-09 Terrorism is a complex phenomenon that cannot be understood through reading of a number of unrelated academic articles or a dry overview of the history of terrorism or the investigative techniques For A New Understanding of Terrorism the Editors have chosen a different paradigm They have selected numerous case studies from actual events that illustrate various typologies of terrorist actions be it from a separatist nationalist lone wolf individual terrorist religious fanatics or environmentalist orientation and they present these cases within the context of following the trajectories of the terrorist activity the terrorist act itself and the response to the event from the relevant authorities Some chapters concentrate on terrorist attacks that actually took place others speculate about the possibilities of an attack occurring sometime in the future such as the chapters on the Olympic Games Aviation or Rail Security When possibilities rather than a specific event are discussed the authors of these chapters draw the attention of the reader towards the same direction the reasoning the actual event and the response that followed The thorough analysis of the presented case studies and the applied counter measures will hopefully if not curtail then possibly at least mitigate the operational and ideological strength of terrorist groups or individual actors A New Understanding of Terrorism will enable the reader to make the connection between the emotional charge inherent in any terrorist activity the cold blooded tactics that lead to the terrorist event itself and the pragmatic and very straightforward but at the same time very simplistically designed strategic response that has to come from a synergy between academics military and law enforcement brainstorming design in order to be more effective in the future

Edwards,Terry D. Edwards,Charles B. Fields,2013-08-01 First published in 1996 One of the primary goals of this series has been to explore new areas of criminology and criminal justice topics that constitute the frontiers of the field This work edited by Sally Edwards Terry Edwards and Charles Fields exemplifies that purpose in its coverage of environmental crime While corporate and political crime developed slowly into mainstream criminology over the last half century environmental crime as an area of emphasis is still in its infancy It is unusual to have many varied and informative perspectives early in a subject s development This volume however demonstrates that many people are already examining environmental crime perhaps as an extension of both the greater environmental movement and the broadening of the popular parameters of crime **Critical Issues in Homeland Security** James D.
