Governing Metropolitan Regions in the 21st Century Donald Phares, 2015 *European Dimension of Metropolitan Policies* Carola Fricke, 2019-03-23 This book questions how policies for the metropolis become Europeanised The book analyses how spatial concepts and political ideas permeate the European multi level system Through an interpretive comparison of five contexts the book provides an overview of the European orientation tracing two interdependent developments First the book examines references to Europe in national and subnational policies In French and German policies metropolitan regions are increasingly framed as being central not only for inter municipal coordination but also as nodes within the European space Moreover Europeanised metropolitan regions such as Lyon and Stuttgart develop European strategies The second development shows how metropolitan regions appear as actors and issues in the European policy arena contributing to a tentative and implicit metropolitan dimension This multi scalar analysis is of interest for scholars and practitioners specialised in metropolitan regions European urban and regional policies geography and related areas

continuing pressures for development and growth while reducing their vulnerability to a range of potential crises And given the tradition of top down centralized state directed planning which drove the economic growth of many of these cities in the last century what prospects are there of them becoming more inclusive and sensitive to the diverse needs of their populations and to the importance of culture heritage and local places in creating liveable cities **OECD Regional Outlook 2016**
