Gun Violence Philip J. Cook, Jens Ludwig, 2000 In the generation that followed Frederick Douglass no African American was more prominent or more outspoken than Ida B Wells Seriously considered as a rival to W E B Du Bois and Booker T Washington for race leadership Wells career began amidst controversy when she sued a Tennessee railroad company for ousting her from a first class car a legal battle which launched her lifelong commitment to journalism and activism In the 1890s Wells focused her eloquence on the horrors of lynching exposing it as a widespread form of racial terrorism Backing strong words with strong actions she The Oxford Handbook of Crime and Public Policy Michael H. Tonry, 2011 This handbook offers a comprehensive examination of crimes as public policy subjects to provide an authoritative overview of current knowledge about the nature scale and effects of diverse forms of criminal behaviour and of efforts to prevent and control them The ^AOxford Handbook of Crime and Public Policy Michael Tonry, 2009-04-22 Using a fresh approach this Oxford Handbook offers a comprehensive examination of crimes as public policy subjects to provide an authoritative overview of current knowledge about the nature scale and effects of diverse forms of criminal behavior and of efforts to prevent and control them Michael Tonry a leading authority on criminology has brought together twenty four of the most distinguished active scholars in the field to present a wide ranging overview and analysis of violent crimes property crimes crimes against morality transactional crimes and transnational crimes Straightforward and accessible individual chapters cover traditional topics such as firearms violence financial crimes and organized crime as well as emerging subjects like terrorism crimes against humanity and internet child pornography *Public Health Reports* ,2000 *Crime and Public Policy* James Q. Wilson, Joan Petersilia, 2012-06-01 Crime in the United States has fluctuated considerably over the past thirty years as have the policy approaches to deal with it During this time criminologists and other scholars have helped to shed light on the role of incarceration prevention drugs guns policing and numerous other aspects to crime control Yet the latest research is rarely heard in public discussions and is often missing from the desks of policymakers This book accessibly summarizes the latest scientific information on the causes of crime and evidence about what does and does not work to control it Thoroughly revised and updated this new version of Crime and Public Policy will include twenty chapters and five new substantial entries As with previous editions each essay reviews the existing literature discusses the methodological rigor of the studies identifies what policies and programs the studies suggest and then points to policies now implemented that fail to reflect the evidence The chapters cover the principle institutions of the criminal justice system juvenile justice police prisons probation and parole sentencing how broader aspects of social life inhibit or encourage crime biology schools families communities and topics currently generating a great deal of attention criminal activities of gangs sex offenders prisoner reentry changing crime rates With contributions from trusted leading scholars Crime and Public Policy offers the most comprehensive and balanced guide to how the latest and best social science research informs the understanding of

crime and its control for policymakers community leaders and students of crime and criminal justice **Juvenile Offenders and Guns** Diane Marano,2015-11-17 *Juvenile Offenders and Guns* explores how and why twenty five incarcerated young men of color acquired and used guns and how guns made them feel Guns have multiple meanings and serve many purposes for these youth as they attempt to construct a capable masculinity in their worlds growing up in homes where money is often scarce and fathers absent **Forum for Applied Research and Public Policy** ,2000 **The Ethics of Poker** Todd M. Furman,2017-08-07 Is it morally permissible to plunder a drunken player at the poker table In a game of bluffing are all deceits acceptable Is it wrong to play against a pathological gambler Are there any real right and wrongs within poker other than violations of the rules The first of its kind this book explores the moral dimensions of playing poker for money in a detailed discussion of applied ethics Topics include the moral standing of bluffing collusion versus soft play the problem of players staked by backers and Why Kant Can't Play Poker *Maconochie's Gentlemen* Norval Morris,2003-09-11 In 1840 Alexander Maconochie a privileged retired naval captain became at his own request superintendent of two thousand twice convicted prisoners on Norfolk Island a thousand miles off the coast of Australia In four years Maconochie transformed what was one of the most brutal convict settlements in history into a controlled stable and productive environment that achieved such success that upon release his prisoners came to be called Maconochie's Gentlemen Here Norval Morris one of our most renowned criminologists offers a highly inventive and engaging account of this early pioneer in penal reform enhancing Maconochie's life story with a trenchant policy twist Maconochie's life and efforts on Norfolk Island Morris shows provide a model with profound relevance to the running of correctional institutions today Using a unique combination of fictionalized history and critical commentary Morris gives this work a powerful policy impact lacking in most standard academic accounts In an era of mass incarceration that rivals that of the settlement of Australia Morris injects the question of humane treatment back into the debate over prison reform Maconochie and his Marks system played an influential role in the development of prisons but for the last thirty years prison reform has been dominated by punitive and retributive sentiments the conventional wisdom holding that we need supermax prisons to control the worst of the worst in solitary and harsh conditions Norval Morris argues to the contrary holding up the example of Alexander Maconochie as a clear cut alternative to the living hell of prison systems today Restorative Justice & Responsive Regulation John Braithwaite,2002 Braithwaite's argument against punitive justice systems and for restorative justice systems establishes that there are good theoretical and empirical grounds for anticipating that well designed restorative justice processes will restore victims offenders and communities better than existing criminal justice practices Counterintuitively he also shows that a restorative justice system may deter incapacitate and rehabilitate more effectively than a punitive system This is particularly true when the restorative justice system is embedded in a responsive regulatory framework that opts for deterrence only after restoration repeatedly fails and incapacitation only after escalated deterrence fails Braithwaite's empirical research demonstrates that active

deterrence under the dynamic regulatory pyramid that is a hallmark of the restorative justice system he supports is far more effective than the passive deterrence that is notable in the stricter sentencing grid of current criminal justice systems

Crime and Justice, Volume 42: Crime and Justice in America Michael Tonry, 2013-10-06 For the American criminal justice system 1975 was a watershed year. Offender rehabilitation and individualized sentencing fell from favor. The partisan politics of law and order took over. Among the results four decades later are the world's harshest punishments and highest imprisonment rate. Policymakers' interest in what science could tell them plummeted just when scientific work on crime, recidivism, and the justice system began to blossom. Some policy areas, sentencing, gun violence, drugs, youth violence, became evidence-free zones. In others, developmental crime prevention, policing, recidivism studies, evidence mattered. **Crime and Justice in America 1975-2025** tells how policy and knowledge did and did not interact over time and charts prospects for the future. What accounts for the timing of particular issues and research advances? What did science learn or reveal about crime and justice, and how did that knowledge influence policy? Where are we now, and perhaps even more important, where are we going? The contributors to this volume, the leading scholars in their fields, bring unsurpassed breadth and depth of knowledge to bear in answering these questions. They include Philip J. Cook, Francis T. Cullen, Jeffrey Fagan, David Farrington, Daniel S. Nagin, Peter Reuter, Lawrence W. Sherman, and Franklin E. Zimring. For thirty-five years, the *Crime and Justice* series has provided a platform for the work of sociologists, psychologists, criminal lawyers, justice scholars, and political scientists as it explores the full range of issues concerning crime, its causes, and its remedies.

The ^AContradictions of American Capital Punishment Franklin E. Zimring, 2004-11-18 Why does the United States continue to employ the death penalty when fifty other developed democracies have abolished it? Why does capital punishment become more problematic each year? How can the death penalty conflict be resolved? In *The Contradictions of American Capital Punishment*, Frank Zimring reveals that the seemingly insoluble turmoil surrounding the death penalty reflects a deep and long-standing division in American values, a division that he predicts will soon bring about the end of capital punishment in our country. On the one hand, execution would seem to violate our nation's highest legal principles of fairness and due process. It sets us increasingly apart from our allies and indeed is regarded by European nations as a barbaric and particularly egregious form of American exceptionalism. On the other hand, the death penalty represents a deeply held American belief in violent social justice that sees the hangman as an agent of local control and safeguard of community values. Zimring uncovers the most troubling symptom of this attraction to vigilante justice in the lynch mob. He shows that the great majority of executions in recent decades have occurred in precisely those Southern states where lynchings were most common a hundred years ago. It is this legacy, Zimring suggests, that constitutes both the distinctive appeal of the death penalty in the United States and one of the most compelling reasons for abolishing it. Impeccably researched and engagingly written, *Contradictions in American Capital Punishment* casts a clear new light on America's long and troubled embrace of the death penalty.

Control Robert J. Spitzer, 2025-08-28 Since its initial publication in 1995 this book has become the classic work on every important element of the tumultuous national gun debate in America This new edition brings together the latest developments and research in gun politics policy law history and criminology to provide a comprehensive and accessible source widely used by scholars journalists and in classrooms In this era of polarized politics this book provides a unique window into how and why that polarization drives our politics Among the new topics covered in this edition are the Supreme Court's new foray into applying history to evaluate modern gun laws the effects of political whipsawing between Democratic and Republican control of government and the consequences of that for gun laws violence and policy New to the Tenth Edition Analysis of the Supreme Court's *Rahimi* decision that for the first time implemented its controversial history based standard for judging the constitutionality of current gun laws Highlights the whiplash between the pro gun policy actions of the Biden administration and the second Trump administration's about face to roll back those initiatives Chronicles the rise and nearly cataclysmic implosion of the once vaunted National Rifle Association as self created problems brought it to the brink of disaster and as legal actions against the NRA finally came to an end Elucidates the scramble of other gun rights groups to replace the NRA as the nation's foremost anti gun law organization Presents new and updated statistical research on gun ownership in America gun related fatalities public opinion support of red flag laws and other gun control measures After a surge in gun violence and gun ownership both have receded to pre pandemic levels and the murder rate continues its decline after a short upsurge Includes new pedagogical features of chapter summaries and discussion questions in each chapter

Viscusi, 2004-05-13 Recent high profile lawsuits involving cigarettes guns breast implants and other products have created new frictions between litigation and regulation Increasingly litigation is being used as a financial lever to force companies to accept negotiated regulatory policies policies that invariably involve less public input and accountability than those arising from government regulation The process not only usurps the traditional governmental authority for regulation but also shifts the locus of establishing tax policy from the legislature to the parties involved in the litigation Citizen interests are not explicitly represented and there is no mechanism to ensure that these outcomes are in society's best interests By focusing on case studies involving the tobacco industry guns lead paint breast implants and health maintenance organizations the contributors to this volume collectively shed light on the likely consequences of regulation through litigation for insurance markets and society at large They analyze the ramifications of large scale lawsuits mass torts and class actions for the insurance market and advocate increased public scrutiny of attorney reimbursement and a competitive bidding process for all lawsuits involving government entities as the plaintiffs
