Sustainable Energy for All David Ockwell, Rob Byrne, 2016-08-19. Despite decades of effort and billions of dollars spent, two thirds of people in sub-Saharan Africa still lack access to electricity, a vital precursor to economic development and poverty reduction. Ambitious international policy commitments seek to address this, but scholarship has failed to keep pace with policy ambitions, lacking both the empirical basis and the theoretical perspective to inform such transformative policy aims. Sustainable Energy for All aims to fill this gap. Through detailed historical analysis of the Kenyan solar PV market, the book demonstrates the value of a new theoretical perspective based on Socio-Technical Innovation System Building. Importantly, the book goes beyond a purely academic critique to detail exactly how a Socio-Technical Innovation System Building approach might be operationalized in practice, facilitating both a detailed plan for future comparative research as well as a clear agenda for policy and practice. Chapters 1 and 6 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution (CC BY) 4.0 license.

Handbook on the Economics of Renewable Energy Pablo del Río, Mario Ragwitz, 2023-07-01. Renewable energy technologies produce many measurable benefits, such as a clear reduction in greenhouse gas emissions. However, it is also apparent that these methods of energy production come with costs. Discussing renewable energy developments within an economic context, this pertinent Handbook provides a comprehensive view of the present and future dimensions of renewable energy use.

Routledge Handbook of Climate Law and Governance Marie-Claire Cordonier Segger, Christina Voigt, 2024-11-29. The Routledge Handbook of Climate Law and Governance recognises calls from the United Nations (UN) Intergovernmental Panel on Climate Change (IPCC) The Elders and others for climate justice and urgent action and convenes insights from leading legal and institutional experts, professors, professionals and early career scholars on emerging climate law and policy challenges, commitments and solutions. The collection explores the role of law and governance in scaling up global responses to climate change and advancing sustainability. Based on careful study of international advances and the full spectrum of Nationally Determined Contributions (NDCs) to the global response to climate change as submitted by Paris Agreement Parties to the UN Framework Convention on Climate Change (UNFCCC), the volume compiles a compelling, coherent and systematic topical account from across diverse legal jurisdictions. Analytical chapters by leading experts, practitioners and scholars close to ongoing climate negotiations explore recent legal and institutional innovations related to climate change which can support implementation and compliance with the Paris Agreement and advance the global Sustainable

Development Goals SDGs They highlight ways to raise ambition through law and policy to reform national legal and institutional arrangements to implement NDCs and to further develop international law and governance in the face of the existential threat of climate change and the world sustainable development commitments Presenting a pathway for advancing climate ambition in the coming decades this book will be of interest to government officials academics students professionals and policy makers working in the area of climate law and governance *Economics of Sustainable Energy in Agriculture* Ekko C. van Ierland,A.G.
