Handbook On Drowning Handbook On Drowning:

Handbook on Drowning Joost J.L.M. Bierens, 2006-02-08 by Jan Carel van Dorp The board of Governors of the Maatschappij tot Redding van Drenkelingen is happy to introduce this congress book the fruit of much effort in recent years of many devoted researchers in the fields of prevention rescue and treatment of drowned people It is a compilation of the results of their successful studies as laid down during the World Congress on Drowning held in Amsterdam on 26 28 June 2002 Background Through the ages death by drowning like so many other causes was accepted as a part of life Water brings life water takes life burial follows It was not until the 17th or even as late as the 18th century that it became apparent that people could be effectively rescued by bystanders that many seemingly dead drowning victims only died after burial and that some of them could have been saved from this fate had they received medical attention In Europe it was the so called Age of Enlightenment with changing attitudes towards fellow man and social initiatives underway including the founding of charitable societies At that time three noblemen in Amsterdam realised that too many victims who had fallen in the waters of Amsterdam were left to their fate and died Hence in 1767 they founded a society for the rescue of drowning victims de Maatschappij tot Redding van Drenkelingen Their initiative was widely applauded In the years that followed other cities in Holland started their own initiatives

Drowning by Accident Elizabeth Meinhard, 2022-02-15 Drowning By Accident explains why it is so easy to drown where accidents happen and how

to save lives by early rescue and resuscitation More than 600 people die by drowning in Britain every year Swimming is promoted as a particularly safe form of exercise so that swimmers forget or ignore the dangers of frigid lakes swollen rivers incoming tides or outgoing rip currents Drowning accidents take place because we don't recognise water as a hostile environment We overestimate the strength and endurance of our bodies and underestimate the power and deceptiveness of water Year after year victims lose their lives in typical drowning accidents often sinking so quickly and silently that nearby family friends and onlookers fail to notice the tragedy taking place close beside them Babies drown in baths Toddlers drown in garden ponds School children fall off rafts Teenagers strike too far from the shore Pensioners wade into rivers to save their dogs Victims often die within minutes of sinking beneath the surface A quarter of those who reach hospital alive will also die while others survive with severe permanent brain damage This means that it is vitally important for parents grandparents teachers lifeguards and lawmakers to recognise the risks and prevent drowning accidents before they take place
