A History of Modern Translation Knowledge Lieven D'hulst, Yves Gambier, 2018-06-28

A History of Modern Translation Knowledge is the first attempt to map the coming into being of modern thinking about translation. It breaks with the well established tradition of viewing history through the reductive lens of schools theories turns or interdisciplinary exchanges. It also challenges the artificial distinction between past and present and it sustains that the latter's historical roots go back far beyond the 1970s. Translation Studies is but part of a broader set of discourses on translation we propose to label translation knowledge. This book concentrates on seven processes that make up the history of modern translation knowledge: generating, mapping, internationalising, historicising, analysing, disseminating and applying knowledge. All processes are covered by 58 domain experts and allocated over 55 chapters with cross references. This book is indispensable reading for advanced Master and PhD students in Translation Studies who need background information on the history of their field with relevance for Europe, the Americas and large parts of Asia. It will also interest students and scholars working in cultural and social history.

Reflections on Translation Theory Andrew Chesterman, 2017-04-26

Originally published in different journals and collected volumes, these papers in conceptual analysis cover some central topics in translation theory and research: types of theory and hypothesis, causality and explanation, norms, strategies and so called universals, translation sociology and ethics. There are critical reviews of Catford's theory and of Skopos theory and of Kundera's views on literary translation and detailed analyses of the literal translation hypothesis and the unique items hypothesis. The methodological discussions which draw on work in the philosophy of science will be of special relevance to younger researchers, for example those starting work on a doctorate. Some of the arguments and positions defended, for instance on the significant status of conceptual interpretive hypotheses and the ideal of consilience, relate to wider ongoing debates and will interest any scholar who is concerned about the increasing fragmentation of the field and about the future of Translation Studies. Let the dialogue continue.

Translation and Practice Theory Maeve Olohan, 2020-10-13

Translation and Practice Theory is a timely and theoretically innovative study linking professional practice and translation theory, showing the usefulness of a practice theoretical approach in addressing some of the challenges that the professional world of translation is currently facing, including, for example, the increasing deployment of machine translation. Focusing on the key aspects of translation practices, Olohan provides the reader with an in depth understanding of how those practices are performed as translators interact with people, technologies and other material resources in the translation workplace. The practice theoretical perspective helps to describe and explain the socio-material complexities of present day commercial translation practice but also offers a productive approach for studies of translation and interpreting practices in other settings and periods. This first book length exploration of translation through the lens of practice theory is key reading for advanced students and researchers of Translation Theory. It will also be of interest in the
