Theoretical Issues in Reading Comprehension Rand J. Spiro, Bertram C. Bruce, William F. Brewer, 2017-11-03 Research in cognitive psychology linguistics and artificial intelligence the three disciplines that have the most direct application to an understanding of the mental processes in reading is presented in this multilevel work originally published in 1980 that attempts to provide a systematic and scientific basis for understanding and building a comprehensive theory of reading comprehension The major focus is on understanding the processes involved in the comprehension of written text Underlying most of the contributions is the assumption that skilled reading comprehension requires a coordination of text with context in a way that goes far beyond simply chaining together the meanings of a string of decoded words The topics discussed are divided into five general areas Global Issues Text Structure Language Knowledge of the World and Inference Effects of Prior Language Experience and Comprehension Strategies and Facilitators and represent a broad base of methodology and data that should be of interest not only to those concerned with the reading process but also to basic science researchers in psychology linguistics artificial intelligence and related disciplines

Understanding and Teaching Reading Emerald Dechant, 2013-09-13 In the words of Aldous Huxley Every man who knows how to read has it in his power to magnify himself to multiply the ways in which he exists to make his life full significant and interesting Few people question the value of reading in fact most extol its virtues As our culture becomes more complex reading plays an increasingly greater role in satisfying personal needs and in promoting social awareness and growth In the last 20 years the teaching of this invaluable skill has focused so intensely on comprehension and prediction from context that it has lost sight of the significance of automaticity and fluency in the word identification process Reading is a synthesis of word recognition and comprehension thus this text is about these basic processes and their integration A common plea from teachers today is that research and psychology be translated into teaching behavior Therefore the aim of this book is twofold one to identify report organize and discuss those bits of data research and theory that are most relevant to the teacher's understanding of the reading process and two to help educators to interpret and apply theory and research data to everyday classroom teaching as well as to the problems encountered frequently in developmental and remedial teaching
