

Post-operative instructions on abscess incision and drainage: Developing the abscess pathway

Background

According to the Royal College of Surgeons of England's "Good Surgical Practice" (2016) guidance, operation notes must include "detailed postoperative care instructions" to facilitate continuity of care by clinicians. This is especially important for abscess incision and drainage (I&D), a common day-case procedure where many times patients are left with complex, inaccessible wounds requiring frequent dressings.

Aim

To investigate and improve the compliance of post-operative documentation for I&D procedures performed at Royal University Hospital.

Methods

We conducted a retrospective analysis of 100 consecutive abscess incision and drainage (I&D) procedures carried out at a district general hospital during the period of July to October 2022. We examined the operation note to assess the presence of post-operative guidance related to antibiotics, analgesia, dressing management, showering, resuming daily activities, and follow-up instructions.

Conclusion

Documentation of post-operative instruction for abscess I&D is partially inconsistent, increasing risks of patient anxiety, pain, infection, and re-presentation to hospital. Data collected will be used to create the "Abscess Pathway" to standardize information provided to patients in the pre-/post-operative period in the form of leaflets and personalised preferences.
