Diversity, Equity, and Inclusion in Astronomy Jörg Matthias Determann, 2023-11-14 Astronomy is a field concerned with matters very distant from Earth. Most phenomena, whether observed or theorized, transcend human spaces and timescales by orders of magnitude. Yet many scientists have been interested not just in the events that have occurred millennia before Earth's inception but also in their very own society here and now. Since the first half of the twentieth century, an increasing number of them have pursued parallel careers as both academics and activists. Besides publishing peer-reviewed papers, they have promoted a great variety of underrepresented groups within their discipline. Through conferences, newsletters, and social media, they have sought to advance the interests of women, members of racial and ethnic minorities, LGBTQ, and disabled people. While these activists have differed in the identities they focus on, they have come to share a conviction that diversity and inclusion are crucial for scientific excellence as well as social justice. In this book, you will read of the biographies and institutional contexts of key agents in the diversification of modern astronomy. As most are recent figures whose discoveries have not been commemorated by Nobel Prizes, they are relatively unknown among historians of science. They have, however, been central to discussions about who has privileged access to the tools of astronomical inquiry, including powerful telescopes and extensive databases. As such, they have also significantly shaped views of our universe.

Balance de las políticas de educación superior en la Cuarta Transformación (2018-2024) Romualdo López, 2024-07-17 Este libro trata desde diferentes posturas y marcos valorativos la docencia, la investigación y la extensión y difusión de la cultura en el nivel superior durante la autodenominada Cuarta Transformación. Evidentemente, hay coincidencias de referencia en la mayor parte de los artículos porque toman en cuenta hechos que están presentes: hay una nueva regulación con respecto a la educación superior, un nuevo artículo tercero constitucional, una nueva Ley General de Educación Superior, un extemporáneo Programa Nacional de Educación superior publicado a fines de 2023, un nuevo CONAHCyT, nuevas reglas del Sistema Nacional de Investigadores. Casi todos los articulistas comparten los principios y objetivos de la Cuarta Transformación: la educación superior como un derecho y, por ende, la obligación del estado de proporcionarla; una educación incluyente, sobre todo para aquellos que históricamente han sido excluidos; una educación superior que sea gratuita en un corto plazo y universal para todos aquellos egresados de la educación media superior que deseen continuar sus estudios; una ciencia que contribuya a resolver los grandes problemas nacionales; un nuevo sistema de evaluación y acreditación de instituciones, programas académicos y estudiantes; la construcción de un nuevo sistema de información que sea confiable, oportuno y accesible. Es claro para todos los participantes que la intención del presidente de la República, recogida y avalada por la Subsecretaría de Educación Superior y el CONAHCyT, fue y es marcar una ruptura con los 30 años de un conjunto de políticas públicas neoliberales y tratar de proponer una nueva perspectiva para la educación superior. En el balance que hacen los autores de lo realizado en el sexenio, se reconocen algunos avances, pero se documenta que están lejos de cumplir medianamente las expectativas. Tres son

los factores más mencionados a una vuelta al centralismo en la toma de decisiones en lugar de buscar la participación de las instituciones b una notoria ausencia de políticas públicas para llevar a cabo los propósitos y c un incumplimiento flagrante del ejecutivo y del legislativo al no asignar los fondos establecidos en la Ley General de educación superior para atender gradualmente la universalización y gratuidad y además una reducción del presupuesto a pesos constantes del presupuesto asignado a la educación superior la ciencia y la tecnología
