Messick,Roderick M. Kramer,2004-09-22 In this book some of the world s leading scholars come together to describe their thinking and research on the topic of the psychology of leadership Most of the chapters were originally presented as papers at a research conference held in 2001 at the Kellogg School of Management of Northwestern University The contributions span traditional social psychological areas as well as organizational theory examining leadership as a psychological process and as afforded by organizational constraints and opportunities The editors goal was not to focus the chapters on a single approach to the study and conceptualization of leadership but rather to display the diversity of issues that surround the topic Leadership scholars have identified a host of approaches to the study of leadership What are the personal characteristics of leaders What is the nature of the relation between leaders and followers Why do we perceive some people to be better leaders than others What are the circumstances that evoke leadership qualities in people Can leadership be taught And so on The contributions

to this book examine these important questions and fall into three categories conceptions of leadership factors that influence the effectiveness of leadership and the consequences and effects of leadership on the leader All in all the chapters of this volume display part of a broad spectrum of novel and important approaches to the study of the psychology of leadership We hope that they are equally useful to those who are or would be leaders and to those who study the topic As recent events have served to remind us it is too important a topic to be ignored by psychologists

Development of Chinese Church Leaders

Otto Lui, 2013-06-14 Confucianism and its influence on culture in East Asia has profoundly impacted Chinese churches and the development of their leaders As a cultural force it continues to affect the perceptions and practices of Chinese pastors and how they lead This work seeks to build an indigenous approach to developing church leaders by understanding the theoretical and the situational foundations of relational leadership from both cultural and biblical perspectives The research is further enriched through case studies and interviews observing the practices of leadership in contemporary Chinese churches

Jesus Only Ernan Norman, 2011-11-01 The focus and theme of this book is Jesus only The eternal verity taught in Scripture is that Jesus alone saves Therefore the central focus of the church must be on Jesus Christ the One crucified risen ascended interceding and coming again This was the secret to the life and power of the apostolic church Everything about the early church as recorded in the book of Acts was due to the presence and power of the Lord in His church The Scriptures clearly speak about their passion but also about the One who was central to their preaching teaching and living as a body of believers And daily in the temple and in every house they ceased not to teach and preach Jesus Christ Acts 5:42 Unfortunately the church no longer measures up to the life that God intended for it In these final and closing days of earth's history Jesus is anxiously awaiting for a portrait of Himself in His church The spirit and power of the apostolic period must return The central focus of Jesus Christ as Lord and Savior must return The dynamic Holy Ghost empowerment of the church must return The daily growth of the church must return The self sacrificing spirit that should mark the life of a true disciple must return There is no question that we must return to primitive godliness and for that to happen the church will have to return to her first love which is a central focus on Jesus
