Petro Lotichio ad novem editionem adornato, & collata prima editione Parisina ac Voegeliana, recensuit, notis & praefatione instruxit Petrus Burmannus Secundus. Tom. 1. -2, 1754 **Latin Scientific Literature, 1450-1850**

Martin Korenjak, 2023 During the early modern period the emergence of modern science took place mainly in Latin the international language of educated discourse However the Latin literature in which most new insights were presented at that time has never been studied as a whole and in its own right This book provides the first overview of this vast body of texts Poëmata omnia, quotquot reperiri potuerunt, editis auctiora et longe emendatiora Petrus Lotichius (jr.), 1754 Supplement to the Catalog of Books of the Miscellaneous Division of the Wyoming State Library Wyoming State Library, 1945 *Evolution and Phylogeny of Bees* John D. Plant, Hannes F. Paulus, 2016 Volume 161 of Zoologica reviews and analyses the evolution and phylogeny of bees It is subdivided into two parts Part One A Preamble to the Evolution and Phylogeny of Bees provides a complete and critical review of all previous attempts to reconstruct the phylogenetic tree of bees Anthophila Apiformes based on morphological bionomic and molecular approaches and presented in chronological sequence up to and including recent publications At the same time the introductory part examines trends in the classification of bees and compares available hypotheses of bee evolution Part One closes with a family wise delineation of the fossil history of bees Part Two A Phylogenetic Study of Bees in Light of Morphological Evidence adds an experimental study to complement the bibliographical analysis provided in Part One The phylogenetic relationships of the larger taxonomic units of bees are tested anew using an extensive dataset of selected morphological features The study uses all common and current computer aided techniques of cladistic analysis parsimony successive implied weight Bayesian and neighbor joining which are applied to representatives of all seven families 22 subfamilies and 48 of 58 tribes of bees The conclusions drawn from this are evaluated for the major groups i e short tongued and long tongued bees and separately for the families subfamilies and tribes in each case In a world currently dominated by molecular genetic approaches to phylogeny this study clearly demonstrates that it is not anachronistic to engage in morphological efforts because progress can be significantly advanced and the pool of available scientific arguments enriched The diversity of the object of investigation justifies a variety of methods This monograph is a much needed reference work of high practical value for all students of bee evolution phylogeny and morphology Further it is ideally suited as good introductory reading material for university level students *Bullingers Korrespondenz mit den Graubündnern* Heinrich Bullinger, 1905
