**Case Resolutions** Marques Vickers,2020-07-18 This edition profiles 75 illustrated murder cases committed within California

Oregon Washington Northern Idaho and Montana Accompanying photography returns the reader to the scene of the crime with precise listed locations The most daunting dilemma of a murder investigation is typically uncovering proof beyond a reasonable doubt that a perpetrator committed a killing The evolution of forensic technology has enabled investigators to match DNA profiles from evidence obtained at a crime scene with specific individual samplings This development has resulted in several high profile cases ultimately achieving resolution Some of the accompanying profiles have developed promising suspects and probable perpetrators but lacked the tangible evidence or persuasive courtroom presentation to convict In a few instances due to the notoriety of the trial the court of popular opinion did convict the defendant yet they

remain free of incarceration Other cases have simply lacked accompanying evidence from the outset and subsequent clues or confessions have never materialized For a victim s immediate circle of family acquaintances and even society in general a lack of closure becomes an accompanying torment Stolen lives deserve accountability and one cannot fully understand the enormity of loss without concrete explanations of motive Given time some of these cases may one day find closure Some murderers do have a conscience and scientific advancements may one day piece together the fractured incoherency of inconclusive evidence
