Lost Ancient High Technology Of Egypt Travelers Edition:

Lost Ancient High Technology of Egypt Brien Foerster, 2015-09-28 The history of Egypt is of course a rich one dating back at least 5000 years to the first of the Pharaohs who created what was to be remembered through their works and deeds especially in stone Among their most famous achievements are the Great Pyramids of the Giza Plateau and the Sphinx However what if evidence strongly suggests that some of these great works were in fact created thousands of years before the dynastic Egyptians and that the Pharaohs simply inherited and renamed them This book is a journey from the southern most area of Egypt all the way to the Giza Plateau Along the way many stone structures were examined that appeared to have been at least partially created using advanced technologies that the Pharaohs simply did not have technologies that in some cases appear superior to our own Geologists stone masons engineers and other professionals were consulted in order to create this work along with experts on the oral traditions of this extremely ancient land and the results will surprise you Clearly there was a civilization before the Pharaohs who had advanced technologies and these people were called the Khemitians

Lost Technologies of Ancient Egypt Christopher Dunn, 2010-06-24 A unique study of the engineering and tools used to create Egyptian monuments Presents a stone by stone analysis of key Egyptian monuments including the statues of Ramses II and the tunnels of the Serapeum Reveals that highly refined tools and mega machines were used in ancient Egypt From the pyramids in the north to the temples in the south ancient artisans left their marks all over Egypt unique marks that reveal craftsmanship we would be hard pressed to duplicate today Drawing together the results of more than 30 years of research and nine field study journeys to Egypt Christopher Dunn presents a stunning stone by stone analysis of key Egyptian monuments including the statue of Ramses II at Luxor and the fallen crowns that lay at its feet His modern day engineering expertise provides a unique view into the sophisticated technology used to create these famous monuments in prehistoric times Using modern digital photography computer aided design software and metrology instruments Dunn exposes the extreme precision of these monuments and the type of advanced manufacturing expertise necessary to produce them His computer analysis of the statues of Ramses II reveals that the left and right sides of the faces are precise mirror images of each other and his examination of the mysterious underground tunnels of the Serapeum illuminates the finest examples of precision engineering on the planet Providing never before seen evidence in the form of more than 280 photographs Dunn s research shows that while absent from the archaeological record highly refined tools techniques and even mega machines must have been used in ancient Egypt
