Sharlamanov, 2024-03-04 This book identifies the turning points in Habermas's work and his transition from one stage to another in the development of his theoretical oeuvre Habermas began his academic career as part of the Frankfurt School but the two key points at which his career changes trajectory are moving from historical materialism to normative idealism and playing with some of the ideas of liberalism Normative idealism is an ahistorical theory that insists on the independence of the normative from material reality severing the connection between base and superstructure that Marx wrote about The break with the basic concepts of Marxism enabled Habermas to build his own discursive critical theory which especially since the end of the 1980s takes the ideas of liberalism seriously This book makes a systematic multidimensional and detailed

analysis of Habermas's theoretical oeuvre in two dimensions chronological in the order in which Habermas worked on certain topics and thematic enclosing certain thematic units **Grace, Governance and Globalization** Martin G. Poulson, Stephan van Erp, Lieven Boeve, 2017-04-06 What role does could or should theology play in current discussions about our political realities Is there a place for theological worldviews in the public conversation about policy making Should theology critically unmask the underlying theological and metaphysical sources of contemporary politics The contributors to this volume reflect on new questions in public and political theology inspired by the theology of Edward Schillebeeckx They discuss a variety of theological traditions and theories that could offer substantial contributions to current political challenges and debate whether theology should contribute to the liberation of communities of poor and suffering people
