HACCP in Meat, Poultry and Fish Processing A.M. Pearson,T.R. Dutson,1999-01-31 Since its development by The Pillsbury Company as part of the US space program the HACCP hazard analysis critical control point system has become the most important technique for the identification and prevention of foodborne biological chemical and physical hazards in food processing This book presents the latest information on the HACCP concept and gives practical examples of its implementation at all stages of food production and processing from the farm to the consumer In addition guidelines are given for the management of the HACCP system within the food industry and how it can be incorporated into a total quality management program The role of predictive microbiology in HACCP is examined and the relationship of HACCP principles to existing and future international agreements and regulations is explained This book is essential reading for quality control personnel production and processing managers in the food industry and for government regulatory officials It will also be of great interest to academic researchers studying the microbiology and quality of meat poultry and fish products

Advances in Meat Research A.M. Pearson,T.R. Dutson,1985-09-30 The Advances in Meat Research series has arisen from a perceived need for a comprehensive coverage of certain topics that are pertinent to meat and meat products We the editors have made the decision to concentrate on a series of related topics that are deemed to be important to an understanding of meat both fresh and processed It is our sincere hope that by focusing upon areas related to meat science that researchers who contribute to this volume can not only update those involved in academia and industry but also promulgate facts that may lead to solutions of meat industry problems and aid in improving the efficiency of various associated industrial processes We have chosen to devote Volume 1 to electrical stimulation in view of the widespread interest in its meat industry applications Although the classical study by A Harsham and Fred Deatherage was published in 1951 it was not accepted by the meat industry owing to a number of factors that are discussed in the text These investigators did however lay the groundwork for modern electrical stimulation of carcasses by their detailed studies on the effects of varying current voltage frequency wave forms and time The basic information provided by these workers saved a great amount of experimentation by those who subsequently rediscovered electrical stimulation

HACCP in Meat, Poultry, and Fish Processing A. M. Pearson,T. R. Dutson,2012-12-06 The HACCP hazard analysis critical control point concept for food products was an outgrowth of the US space program with the demand for a safe food supply for manned space flights by the National Aeronautics and Space Administration NASA The original work was carried out by the Pillsbury Company under the direction of Roward E Bauman who as the author of chapter 1 describes the evolution of the HACCP system and its adaptation to foods The second chapter discusses the adoption of HACCP principles and explains how they fit into the USDA and FDA meat poultry and seafood inspection systems The next chapter discusses how HACCP principles can be extended to production of meat poultry and seafoods a most important area involved in producing a safe food supply Chapter 4 deals with

the use of HACCP in controlling hazards encountered in slaughtering and distribution of fresh meat and poultry while chapter 5 discusses the problem both spoilage and hazards involved in processing and distribution of meat poultry and seafood products Chapter 6 covers the entire area of fish and seafoods including both fresh and processed products from the standpoints of spoilage and hazards *Haccp in the Meat Industry* M. Brown,2000-09-22 The recent outbreaks of E coli and BSE have ensured that the issue of meat safety has never had such a high profile Meanwhile HACCP has become the preferred tool for the management of microbiological safety Against a background of consumer and regulatory pressure the effective implementation of HACCP systems is critical Written by leading experts in the field HACCP in the meat industry provides an authoritative guide to making HACCP systems work effectively This book examines the HACCP in the meat industry across the supply chain from rearing through to primary and secondary processing **Production and**

Processing of Healthy Meat, Poultry and Fish Products A.M. Pearson,T.R. Dutson,2013-03-09 The central theme for this volume was chosen since consumers have great interest in purchasing low fat low salt and reduced cholesterol meat poultry and fish products As in past volumes experts in the field have been chosen to write chapters with emphasis on their breadth of knowledge in each specific area Efforts were also made to obtain authors from different countries in order to give the book a worldwide perspective Chapter 1 stresses the nutritional and sensory properties that meat poultry and fish products make to healthful diets and discusses consumer concerns about these products Chapter 2 covers dietary recommendations in major consumer nations along with data from food composition tables and the dietary contributions of meat poultry and fish to meeting dietary needs Chapter 3 discusses the labeling of low and reduced fat salt products which although written mainly from the US viewpoint may serve as a model for labeling in other countries Chapter 4 reviews the rationale for reducing fat energy levels in muscle foods problems encountered in their production and how these may be solved Chapter 5 discusses the scientific basis for reducing the salt sodium content in food products and the health benefits derived from lowering salt intake Methods of reducing the cholesterol content of these animal products is reviewed in Chapter 6
