Speaking Power to Truth Michael Keren, Richard Hawkins, 2015-11-20 Online discourse has created a new media environment for contributions to public life one that challenges the social significance of the role of public intellectuals intellectuals who whether by choice or by circumstance offer commentary on issues of the day The value of such commentary is rooted in the assumption that by virtue of their training and experience intellectuals possess knowledge that they understand what constitutes knowledge with respect to a particular topic are able to distinguish it from mere opinion and are in a position to define its relevance in different contexts When intellectuals comment on matters of public concern they are accordingly presumed to speak truth whether they are writing books or op ed columns or appearing as guests on radio and television news programs At the same time with increasing frequency discourse on public life is taking place online This new digital environment is characterized by abundance an abundance of speakers discussion and access But has this abundance of discourse this democratization of knowledge as some describe it brought with it a corresponding increase in truth Casting doubt on the assertion that online discourse with its proliferation of voices will somehow yield collective wisdom Speaking Power to Truth raises concerns that this wealth of digitally enabled commentary is in fact too often bereft of the hallmarks of intellectual discourse an epistemological framework and the provision of evidence to substantiate claims Instead the pursuit of truth finds itself in competition with the quest for public reputation access to influence and enhanced visibility But as knowledge is drawn into the orbit of power and as the line between knowledge and opinion is blurred what role will the public intellectual play in the promotion and nurturing of democratic processes and goals In exploring the implications of the digital transition the contributors to Speaking Power to Truth provide both empirical evidence of and philosophical reflection on the current and future role of the public intellectual in a technologically mediated public sphere Contributions by Barry Cooper Jacob Foster Karim Ally Kassam Boaz Miller Liz Pirnie and Eleanor Townsley

Visual Security Studies Juha Vuori, Rune

Saugmann,2018-08-06 The present volume engages visibility in security from a variety of angles and explores what the subfield of Visual Security Studies might be To structure this experimentation and to encourage a more careful and multifaceted approach to visibility and security the main conceptual move in this volume is to envision three different transversal meeting points between security and visibility visibility as a modality active in representations and signs of security visibility as practice active in enacting security and visibility as a method active in investigating security These three approaches structure the book together with three areas in which we see visibility as especially pertinent in relation to security in security technologies that envision security and are themselves the objects of visions of security in spectacles of security and security spectatorship and in ways of making security visible In this way the volume works to sensitize International Relations research to visual forms of knowledge and practice by examining visual aspects of security At the same time it allows for debate on how this particular modality of the sensible not only affects what is visible and what is not but also how authority and truth claims come about and how they are compared and evaluated Through engagement with security via the language or code of the visual it is possible to interrogate how scholars in the field understand visibility as well as the economy grammar and performativity of visual articulation and the production of knowledge The volume also examines how visibility can be used as a method in doing research and as a way of presenting research results Visual Security Studies is not a new theory of security or its study instead the present volume suggests that visibility should be envisioned as an aspect of security studies that can be incorporated into pre existing approaches The aim is to highlight how much of contemporary practice is visual and to foster an increased attentiveness to visibility in security politics security practice and to the possibilities of employing visual research methods in security scholarship This book will be of much interest to students of critical security media studies surveillance studies visual sociology and IR in general A

Deconstruction Machines Justin Joque, 2018-02-27 A bold new theory of cyberwar argues that militarized hacking is best understood as a form of deconstruction From shadowy attempts to steal state secrets to the explosive destruction of Iranian centrifuges cyberwar has been a vital part of statecraft for nearly thirty years But although computer based warfare has been with us for decades it has changed dramatically since its emergence in the 1990s and the pace of change is accelerating In *Deconstruction Machines* Justin Joque inquires into the fundamental nature of cyberwar through a detailed investigation of what happens at the crisis points when cybersecurity systems break down and reveal their internal contradictions He concludes that cyberwar is best envisioned as a series of networks whose constantly shifting connections shape its very possibilities He ultimately envisions cyberwar as a form of writing advancing the innovative thesis that cyber attacks should be seen as a militarized form of deconstruction in which computer programs are systems that operate within the broader world of texts Throughout Joque addresses hot button subjects such as technological social control and cyber resistance entities like Anonymous and Wikileaks while also providing a rich detailed history of cyberwar *Deconstruction Machines* provides a necessary new interpretation of deconstruction and timely analysis of media war and technology [The Oxford Handbook of Cyberpsychology](#) Alison Attrill-Smith, Chris Fullwood, Melanie Keep, Daria J. Crisis Style Michael Dango,2021-11-16 In this expansive and provocative new work Michael Dango theorizes how aesthetic style manages crisis and why taking crisis seriously means taking aesthetics seriously Detoxing filtering bingeing and ghosting these are four actions that have come to define how people deal with the stress of living in a world that seems in permanent crisis As Dango argues they can also be used to describe contemporary art and literature Employing what he calls promiscuous archives Dango traverses media and re shuffles literary and art historical genealogies to make his case The book discusses social media filters alongside the minimalism of Donald Judd and La Monte Young and the television shows The West Wing and True Detective It reflects on the modernist cuisine of Ferran Adri and the fashion design of Issey Miyake And it dissects writing by Barbara Browning William S Burroughs Raymond Carver Mark Danielewski Jennifer Egan Tao Lin David Mitchell Joyce Carol Oates Mary Robison and Zadie Smith Unpacking how the styles of these works detox filter binge or ghost their worlds Crisis Style is at once a taxonomy of contemporary cultural production and a theorization of action in a world always in need of repair Ultimately Dango presents a compelling argument for why we need aesthetic theory to understand what we re doing in our world today
